**Influences of the IEA Civic and Citizenship Education Studies** Barbara Malak-Minkiewicz,Judith Torney-Purta,2021-05-26 This open access book identifies the multiple ways that IEA s studies of civic and citizenship education have contributed to national and international educational discourse research policymaking and practice The IEA International Civic and Citizenship Education Study ICCS first conducted in 2009 was followed by a second cycle in 2016 The project was linked to the earlier IEA Civic Education Study CIVED 1999 2000 IEA s ICCS remains the only large scale

international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes and participatory skills. It also discusses in depth how a wide range of countries prepare their young people for citizenship in changing political, social and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999-2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic-related behaviors and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results, indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice and research in an area of education that is becoming increasingly important for many societies.

In the contemporary period, social development and social work are at the forefront of dealing with abject poverty and some of the world's most difficult problems. This book highlights the contemporary African experience in addressing poverty and meeting the needs of vulnerable groups. Two decades ago, James Midgley challenged social workers and others involved in international work to learn from their colleagues in developing countries. This challenge has brought scholars from the North South together through collaborative research, program development and technical assistance and training. **Social Development and Social Work** highlights development-oriented work in Africa in areas such as juvenile offender programs, asset-based community development, women and HIV/AIDS, trafficked women and children affected by war. It includes models of indigenous welfare and integrated development through collaborative and interdisciplinary efforts by universities, government and non-governmental organizations. This book brings African scholarship in social development and social work to the attention of academics, students and practitioners worldwide so they too can learn from it.
