Psychological Assessment in South Africa Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa. The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field. Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments. *Psychological Assessment in South Africa* provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments. The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment. The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists, psychometrists, remedial teachers and human resource practitioners. **Getting**

Schools Working Nick Taylor, Johan Muller, Penny Vinjevold, 2003 A systematic review of research projects into the state of education in South Africa. Minority and Cross-Cultural Aspects of Neuropsychological Assessment F. Richard Ferraro, 2015-07-16 Minority and cross cultural psychology is more relevant now than ever in our diverse world. Given the dramatic local and global changes occurring daily with regard to demographics, population changes and immigration issues, minority and cross cultural psychology is fast becoming a respected and critical area of scientific study. Pair that with the fact that people of all cultures and racial groups are living longer and experiencing age related diseases and disorders, one can easily see the need for additional work on issues related to neuropsychological assessment. This new edition brings to the forefront recent developments by seasoned experts in the field. They offer up their newest projects in minority and cross cultural aspects of neuropsychological assessment and are joined by new up and coming professionals across a wide array of disciplines including psychology, medicine and neuropsychology. Like the first edition, this updated collection sheds light on the ever growing need for adequate neuropsychological assessment to a wider subset of individuals crossing many cultural and minority barriers in the process. Continuously pushing the boundaries of neuropsychological assessment, this collection is essential reading for cognitive and clinical psychologists and neuropsychologists and a model text for advanced courses dealing with minority and cross cultural issues. **The Education Gazette of the Province of the Cape of Good Hope**
