from the prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and advising and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor s degrees and beyond

Focus On: 100 Most Popular English Emigrants to the United States Wikipedia contributors, *Geotechnical Synergy in Buenos Aires 2015* A.O. Sfriso,D. Manzanal,R.J. Rocca,2015-12-10 In November 2015 Buenos Aires Argentina became the location of several important events for geo professionals with the simultaneous holding of the 15th Pan American Conference on Soil Mechanics and Geotechnical Engineering XV PCSMGE the 8th South American Congress on Rock Mechanics SCRM and the 6th International Symposium on Deformation Characteristics of Geomaterials as well as the 22nd Argentinean Congress of Geotechnical Engineering CAMSIGXXII This synergy brought together international experts researchers academics professionals and geo engineering companies in a unique opportunity to exchange ideas and discuss current and future practices in the areas of soil mechanics and rock mechanics and their applications in civil energy environmental and mining engineering This book presents the invited lectures of the 15th Pan American Conference on Soil Mechanics and Geotechnical Engineering XV PCSMGE and the 8th South American Congress on Rock Mechanics SCRM It includes the Casagrande Lecture delivered by Luis Valenzuela and 21 Plenary Keynote and Panelist Lectures from these two Buenos Aires conferences *The Schenley Experiment* Jake Oresick,2017-04-14 The Schenley Experiment is the story of Pittsburgh s first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor

Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v Board of Education*, Schenley succumbed to default segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008 citing over 50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school. A memorable important work of local and educational history, his book is a case study of desegregation, magnet education and the changing nature and legacies of America's oldest public schools.
