After Piketty Heather Boushey, J. Bradford DeLong, Marshall Steinbaum, 2017-05-08 Are Thomas Piketty's analyses of inequality on target? Where should researchers go from here in exploring the ideas he pushed to the forefront of global conversation? In *After Piketty*, a cast of economists and other social scientists tackle these questions in dialogue with Piketty in what is sure to be a much debated book in its own right.

The Every Student Succeeds Act (ESSA) Frederick M. Hess, Max Eden, 2021-03-09 In this foundational book, Frederick M. Hess and Max Eden bring together a cross section of respected academics and journalists to examine key aspects of the Every Student Succeeds Act (ESSA). This volume provides a thematic and in-depth analysis of the central provisions of this landmark legislation, presenting a range of perspectives. The contributors, leading researchers, policy analysts, and journalists, explore the conflicts and compromises that shaped the emerging law, outline its core provisions, and trace its implications for urban districts, states, and the federal government. Complementing these descriptions are chapters presenting opposing viewpoints on the law's merits and its ramifications for future reform efforts. Enacted in December 2015, ESSA represents a major shift of the federal role in education, and its provisions touch on almost every aspect of education policy. Yet it arrived in something of a whirlwind, and scholars, advocates, and policy makers are struggling to make sense of this new act. By bringing together leading thinkers to make sense of this important law, *The Every Student Succeeds Act* provides a solid foundation for scholars, advocates, and policy makers as they begin to navigate a new era in education policy.

Economic Development for Everyone Mark M. Miller, 2017-05-09 How do we create employment, grow businesses, and build greater economic resilience in our low-income communities? How do we create economic development for everyone everywhere, including rural towns, inner-city neighborhoods, aging suburbs, and regions such as Appalachia, American Indian reservations, the Mexican border, and the Mississippi Delta, and not just in elite communities? *Economic Development for Everyone* collects, organizes, and reviews much of the current research available on creating economic development in low-income communities. Part I offers an overview of the harsh realities facing low-income communities in the US today, their many economic and social challenges, debates on whether to try reviving local economies vs. relocating residents, and current trends in economic development that emphasize high-tech industry and high levels of human capital. Part II organizes the sprawling literature of applied economic development research into a practical framework of five dynamic dimensions: empower your residents, begin with basic education, enhance your community, build on existing assets, encourage your entrepreneurs, diversify your economy, and sustain your development. This book, assembled and presented in a unified framework, will be invaluable for students and new researchers of economic development in low-income communities and will offer new perspectives for established researchers, professional economic developers, and planners and public officials. Development practitioners and community leaders will also find new ideas and opportunities along with a broad view on how the many complex parts of economic development interconnect.

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could

lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree
