 Syllabus NCF NCERT Assessing Mathematical Literacy Kaye Stacey,Ross Turner,2014-11-03 This book describes the
 design development delivery and impact of the mathematics assessment for the OECD Programme for International Student
 Assessment PISA First the origins of PISA s concept of mathematical literacy are discussed highlighting the underlying
 themes of mathematics as preparation for life after school and mathematical modelling of the real world and clarifying PISA s
 position within this part of the mathematics education territory The PISA mathematics framework is introduced as a
 significant milestone in the development and dissemination of these ideas The underlying mathematical competencies on
 which mathematical literacy so strongly depends are described along with a scheme to use them in item creation and
 analysis The development and implementation of the PISA survey and the consequences for the outcomes are thoroughly
 discussed Different kinds of items for both paper based and computer based PISA surveys are exemplified by many publicly
 released items along with details of scoring The novel survey of the opportunity students have had to learn the mathematics
 promoted through PISA is explained The book concludes by surveying international impact It presents viewpoints of
 mathematics educators on how PISA and its constituent ideas and methods have influenced teaching and learning practices
 curriculum arrangements assessment practices and the educational debate more generally in fourteen countries
