Large-class Pedagogy David J. Hornsby,Ruksana Osman,Jacqueline De Matos-Ala,2013-08-01 I highly recommend this edited collection It is a timely intervention when universities around the world are facing changes akin to the newspaper industry a decade ago The authors remind us of the potential power of the lecture and that there does not need to be a trade off between the size of the class and the quality of the delivery Professor James Arvanitakis 2012 recipient of the Prime Minister s Teaching and Learning Award University of Western Sydney Australia This is the first book of its kind that considers the complex issues of large classes As such it makes a very important contribution and provides a deep insight into large class pedagogy from a conceptual and practical perspective Dr Mandia Menits Massey University New Zealand If the thought of teaching large classes fills you with dread if you think that pedagogic innovation is impossible in the face of burgeoning student numbers or if you simply wish to understand more about the dynamics of this increasingly common environment in Higher Education then this is the book for you Written by highly experienced academics it is a valuable and long overdue resource for supporting good practice in the large class context Dr Jenny Hadingham University of Rochester New York

Seven Myths About Education Daisy Christodoulou,2014-03-14 In this controversial new book Daisy Christodoulou offers a thought provoking critique of educational orthodoxy Drawing on her recent experience of teaching in challenging schools she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles She examines seven widely held beliefs which are holding back pupils and teachers Facts prevent understanding Teacher led instruction is passive The 21st century fundamentally changes everything You can always just look it up We should teach transferable skills Projects and activities are the best way to learn Teaching knowledge is indoctrination In each accessible and engaging chapter Christodoulou sets out the theory of each myth considers its practical implications and shows the worrying prevalence of such practice Then she explains exactly why it is a myth with reference to the principles of modern cognitive science She builds a powerful case explaining how governments and educational organisations around the world have let down teachers and pupils by promoting and even mandating evidence less theory and bad practice This blisteringly incisive and urgent text is essential reading for all teachers teacher training students policy makers head teachers researchers and academics around the world
