Scanlan, 2019-09-17 The first book to tell the story of the Advanced Placement program the gold standard for academic rigor in American high schools The Advanced Placement program stands as the foremost source of college level academics for millions of high school students in the United States and beyond More than 22 000 schools now participate in it across nearly forty subjects from Latin and art to calculus and computer science Yet remarkably little has been known about how this nongovernmental program became one of the greatest success stories in K 12 education until now In Learning in the Fast Lane Chester Finn and Andrew Scanlan two of the country's most respected education analysts offer a groundbreaking account of one of the most important educational initiatives of our time Learning in the Fast Lane traces the story of AP from its mid twentieth century origins as a niche benefit for privileged students to its emergence as a springboard to college for high schoolers nationwide including hundreds of thousands of disadvantaged youth Today AP not only opens new intellectual

horizons for smart teenagers but also strengthens school ratings attracts topflight teachers and draws support from philanthropists reformers and policymakers At the same time it faces numerous challenges including rival programs curriculum wars charges of elitism the misgivings of influential universities and the difficulty of infusing rigor into schools that lack it In today's polarized climate can AP maintain its lofty standards and surmount the problems that have sunk so many other bold education ventures Richly documented and thoroughly accessible Learning in the Fast Lane is a must read for anyone with a stake in the American school system [The Meritocracy Trap](#) Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people
