Army Research Task Summary: Life sciences and psychological & social sciences United States. Army Research Office,1961 Parasitic Personhood and the Ontology of Eating Lisa Heldke,2025-08-28 Humans must eat and our eating involves us in a cascade of eating relationships that leave life and death biting into each other These realities should but often do not profoundly shape our understanding of personhood This book explores parasitic personhood an alternative to atomistic individualism that acknowledges the biological individual as a network of persistent biological relationships a holobiont and draws insight from the astonishing frequency and variety of parasitic feeding relationships What happens to our conception of personhood if we consider parasitism as more than just a threat to our health Parasitism is a remarkably common form of life however we tend to think of parasites only as dangerous pestilential organisms that should be eliminated What if parasitism in particular persistent eating relationships that threaten to destabilize host organisms were instead the model in terms of which we understood what it means to be a person What if we acknowledged the ineliminability indeed the centrality of parasitism to life and embraced both the persistent eating and the precarity that they entail as central to our understanding of personhood In advocating for parasitic personhood this book joins a history of efforts to uproot atomistic individualism the remarkably durable understanding of personhood that is aptly portrayed by its most well known eighteenth century model the billiard ball smoothly self contained with relationships decidedly external to it The parasitic alternative conceives persons as collections of organisms in relationships that are by turns and all at once essential precarious definitive destabilizing stable and shifting The book asks in what does parasitic personhood consist It goes on to examine some implications of this conception of personhood how is moral agency constituted for the parasitic person and how does parasitic personhood expand our understanding of aesthetic engagement and appreciation This book will absorb anyone who is interested in thinking about the metaphysical significance of their need to eat and their reliance on myriad other organisms to enable them to do so It will engage students and scholars of food and eating particularly those working on the metaphysics of food food and personhood fermentation and the microbiome as well as philosophers considering the ontological significance of food and eating **Our Social World: Condensed** Jeanne H. Rettinger, 2025-03-11 In these days of an ever expanding internet generative AI and term

paper mills students may find it too easy and tempting to cheat and teachers may think they can't keep up. What's needed and what Tricia Bertram Gallant and David A. Rettinger offer in this timely book is a new approach, one that works with the realities of the twenty-first century, not just to protect academic integrity but also to maximize opportunities for students to learn. *The Opposite of Cheating* presents a positive, forward-looking, research-backed vision for what classroom integrity can look like in the GenAI era, both in cyberspace and on campus. Accordingly, the book outlines workable measures teachers can use to better understand why students cheat and to prevent cheating while aiming to enhance learning and integrity. Bertram Gallant and Rettinger provide practical suggestions to help faculty revise the conversation around integrity, refocus classes and students on learning, reconsider the structure and goals of assessment, and generally reframe our response to cheating. At the core of this strategy is a call for teachers, academic staff, institutional leaders, and administrators to rethink how we show up for students and to reinforce and fully support quality teaching, learning, and assessment. With its evidentiary basis and its useful tips for instructors across disciplines, levels of experience, and modes of instruction, this book offers a much-needed chance to pause, rethink our purpose, and refocus on what matters: creating classes that center human interactions that foster the personal and professional growth of our students.

Food as Medicine Maurice M. Iwu, 2016-11-25 This comprehensive book documents African plants used for functional and medicinal foods. It contains more than 60 detailed monographs of African foods describing foods with various characteristics such as prebiotic, probiotic, satiety, immune modulation, stress reduction, sports performance, mental acuity, sleep, supporting metabolic syndrome, antioxidant, and unsaturated fats. Plant description, botanical names, and synonyms, plant part used, habitat, and distribution, folk use, nutritional content, and chemistry are all fully detailed. The book highlights indigenous African food processing technologies up to the modern era.

Multiple Criteria Decision Making in Supply Chain Management A. Ravi Ravindran, 2017-07-12 Supply chain management decisions are made under the conflicting criteria of maximizing profit and customer responsiveness while minimizing supply chain risk. *Multiple Criteria Decision Making in Supply Chain Management* provides a comprehensive overview of multi-criteria optimization models and methods that can be used in supply chain decision making. Presenting the contributions of internationally known authors, researchers, educators, and practitioners, this new book in the *Operations Research Series* provides readers with a single source guide to recent developments in this area. The focus of the book is on the design and operation of the supply chain system, which involves connecting many production and distribution systems, often across wide geographic distances, in such a way that the businesses involved can ultimately satisfy the consumer demand as efficiently as possible, resulting in maximum financial returns to those businesses connected to that supply chain system. The book includes several case studies on the design and operation of supply chain networks in manufacturing and healthcare.

Trends in Teaching Experimentation in the Life Sciences Nancy J. Pelaez, Stephanie M. Gardner, Trevor R. Anderson, 2022-05-11

This book is a guide for educators on how to develop and evaluate evidence-based strategies for teaching biological

experimentation to thereby improve existing and develop new curricula It unveils the flawed assumptions made at the classroom department and institutional level about what students are learning and what help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision making around public policy It will be beneficial to life science instructors biology education researchers and science administrators who aim to improve teaching in life science departments Chapters 6 12 14 and 22 are available open access under a Creative Commons Attribution 4 0 International License via link springer.com

Deep Violence Joanna Bourke, 2015-03-01 2014 marks the 100th anniversary of the declaration of the First World War and with it comes a deluge of books documentaries feature films and radio programs We will hear a great deal about the horror of the battlefield Bourke acknowledges wider truths war is unending and violence is deeply entrenched in our society But it doesn't have to be this way This book equips readers with an understanding of the history culture and politics of warfare in order to interrogate and resist an increasingly violent world Wounding the World investigates the ways that violence and war have become internalized in contemporary human consciousness in everything from the way we speak to the way our children play with one another to the way that we ascribe social characteristics to our guns and other weapons With a remarkable depth of insight Bourke argues for a radical overhaul of our collective stance towards militarism from one that simply aims to reduce violence against people to one that would eradicate all violence Her message is judicious and vital knowledge about weapons and the violence they bring has simply become too important to cast aside or leave to the experts
