Changing the Grade Jonathan Cornue,2017-01-23 Many educators agree that the 100 point grading model is not always a reliable way to evaluate student learning But is there another way to more accurately and equitably grade students and provide high quality information to parents while fostering student learning If so why haven t school districts across the country changed their practices In *Changing the Grade* author and educator Jonathan Cornue presents a detailed model for developing a more reliable standards based grading system including 30 steps to guide you through the process In addition to identifying and addressing the barriers to change such as concerns about how colleges and employers will interpret an alternative grading model Cornue offers a concrete structure for changing the grading system providing guidance on Thinking in a new way about why grades are given and the purpose of a report card grade Identifying what needs to be changed and what actions must be taken to facilitate the change Building a team of stakeholders including teachers principals and guidance counselors to lead the change process Developing the new standards based grading structure Designing standards based assignments and assessments that align with a new grading structure Avoiding grade inflation and Getting buy in from teachers and other staff members principals administrators the board of education and the community by demonstrating that the change process is intentional research based student focused and permanent The book also includes helpful samples of standards based gradebooks homework assignments rubrics and report cards If you are interested in making a systemic and systematic shift to a high quality grading structure that is far less subjective than many commonly found in schools consider *Changing the Grade* Grading Systems, General-education Requirements, and Special Programs at 112 American Colleges and Universities University of Hawaii (Honolulu),Wannaku Abayasekara,1969

Specifications Grading Linda B. Nilson,2023-07-03 In her latest book Linda Nilson puts forward an innovative but practical and tested approach to grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading time empower students to choose the level of attainment they want to achieve reduce antagonism

between the evaluator and the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while upholding rigor In addition specs grading increases students motivation to do well by making expectations clear lowering their stress and giving them agency in determining their course goals Among the unique characteristics of the schema all of which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards 2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel 4 Fosters Higher Order Cognitive Development and Creativity 5 Discourages Cheating 6 Reduces Student Stress 7 Makes Students Feel Responsible for Their Grades 8 Minimizes Conflict Between Faculty and Students 9 Saves Faculty Time and Is Simple to Administer 10 Makes Expectations Clear and Simplifies Feedback for Improvement 11 Assesses Authentically 12 Achieves High Inter Rater Agreement

The Theory and Practice of Grading Writing Frances Zak, Christopher C. Weaver, 1998-02-05 CHOICE 1998 Outstanding Academic Books Grading is one of the thorniest issues writing teachers must deal with yet surprisingly little has been written on this topic As writing teachers move increasingly toward practices that focus on writing as a process they face a growing need to reconsider their systems of grading to determine whether or not these systems support their pedagogies The authors interrogate the grading of individual papers as well as portfolios and the assigning of end of term grades This collection explores the issues and problems that have emerged as conventional grading practices have lagged behind and been challenged by new theories of language While the book will be of interest to theorists Zak and Weaver have also made the book relevant and useful to teachers whose primary interest is the practical consequences of theory in their classrooms Where theoretical discussion takes place the language is clear and accessible Many of the authors write directly from personal experience telling stories of the classroom or writing of new techniques and approaches they have tried They speak with the voices of teachers and the tone and content of their words convey a sense of the immediacy of the topic

Grading Systems and Their Results Webster Paul Reese, 1919 Report on Grading System, 1912-1913 University of Michigan. College of Literature, Science, and the Arts, 1913 The Revised Grading System at Michigan State University Michigan State University. Secretary of the Faculties, 1968
