

### Construction Sequence

As the success or downfall of most projects is usually based upon good or bad organization of tasks to be undertaken and in what order they should be done, it is important to lay out a logical order in which construction process will happen.

For this project the site is of medium size therefore meaning only several operations/processes will be able to carry on simultaneously.

Proposed order of construction:

1. Site clearance & erection of site boundary (Hoarding)
2. Site security setup (Secure storage for materials & plant etc.)
3. Site will be checked for underground utilities before groundwork commences, if any found will be relocated prior to any work commencing.
4. Temporary roads laid on site
5. Site accommodation, offices, welfare facilities will be setup
6. Groundwork completed (Foundations)
7. Footbridge installed
8. Structure (Café/visitor centre completed)
9. Car park surfaced
10. T junction set out
11. Drainage laid and connected on access road and junction
12. Access road and junction surfaced
13. All relevant signage, railings & road markings installed or erected

Some of the activities above can be carried out simultaneously:

- 1.
- 2. & 3.
- 4.
- 5., 6. & 7.
- 8.
- 9. & 10.
- 11.
- 12.
