Bond II* D. Michael P. Mingos,2016-06-18 The series Structure and Bonding publishes critical reviews on topics of research  
concerned with chemical structure and bonding The scope of the series spans the entire Periodic Table and addresses  
structure and bonding issues associated with all of the elements It also focuses attention on new and developing areas of  
modern structural and theoretical chemistry such as nanostructures molecular electronics designed molecular solids surfaces  
metal clusters and supramolecular structures Physical and spectroscopic techniques used to determine examine and model  
structures fall within the purview of Structure and Bonding to the extent that the focus is on the scientific results obtained  
and not on specialist information concerning the techniques themselves Issues associated with the development of bonding  
models and generalizations that illuminate the reactivity pathways and rates of chemical processes are also relevant The  
individual volumes in the series are thematic The goal of each volume is to give the reader whether at a university or in  
industry a comprehensive overview of an area where new insights are emerging that are of interest to a larger scientific  
audience Thus each review within the volume critically surveys one aspect of that topic and places it within the context of the  
volume as a whole The most significant developments of the last 5 to 10 years should be presented using selected examples  
to illustrate the principles discussed A description of the physical basis of the experimental techniques that have been used to  
provide the primary data may also be appropriate if it has not been covered in detail elsewhere The coverage need not be  
exhaustive in data but should rather be conceptual concentrating on the new principles being developed that will allow the  
reader who is not a specialist in the area covered to understand the data presented Discussion of possible future research  
directions in the area is welcomed Review articles for the individual volumes are invited by the volume editors      *Whitaker's
