**Citation Analysis and Dynamics of Citation Networks** Michael Golosovsky, 2019-09-26 This book deals with the science of science by applying network science methods to citation networks and uniquely presents a physics inspired model of citation dynamics This stochastic model of citation dynamics is based on a well known copying or recursive search mechanism The measurements covered in this text yield parameters of the model and reveal that citation dynamics of scientific papers is not linear as was previously assumed This nonlinearity has far reaching consequences including non stationary citation distributions diverging citation trajectories of similar papers and runaways or immortal papers with an infinite citation lifespan The author shows us that nonlinear stochastic models of citation dynamics can be the basis for a quantitative probabilistic prediction of citation dynamics of individual papers and of the overall journal impact factor This book appeals to students and researchers from differing subject areas working in network science and bibliometrics

**How to Write Better Medical Papers** Michael Hanna, 2019-03-20 This book guides medical researchers through all stages of transforming their scientific data and ideas into a published paper Many researchers in medicine including the life sciences and health sciences struggle to get their research written and published Manuscripts are typically rejected and or sent back for revisions several times before ever being published One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers research methodology ethics statistics data visualization writing revising and the practicalities of publishing Instead of wasting the reader s time discussing trivialities of punctuation spelling etc this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals The section Preparing covers the range of methodological ethical and practical aspects that researchers need to address before starting to write their paper The section Analyzing reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems The section Drafting describes what to write in all the various parts of a paper the Introduction Methods Results Discussion Abstract etc The section Revising explains and illustrates how to improve the writing style of any manuscript The section Publishing discusses how to navigate the peer review process and all other practical aspects of the publishing phase This book draws on the author s decade of experience as an independent medical writer and research consultant but it is not written merely as the personal opinion of yet another expert The entire book is grounded in the existing scientific and scholarly literature with extensive references and a lengthy annotated bibliography so readers can quickly obtain more information on any aspect they want Thus this book provides a more evidence based scholarly account of how medical scientific papers should be written in order to improve medical communication and accelerate scientific progress After reading this entire book cover to cover medical researchers will know how to write better quality medical papers and they will be able to publish their work in better journals with less time and struggle This book is essential reading for anyone conducting research in clinical medicine life sciences or health sciences

*Analysis and Visualization of Citation Networks* Dangzhi Zhao, Andreas Strotmann, 2022-06-01 Citation analysis the exploration of reference patterns in the scholarly and scientific literature has long been applied in a number of social sciences to study research impact knowledge flows and knowledge networks It has important information science applications as well particularly in knowledge representation and in information retrieval Recent years have seen a burgeoning interest in citation analysis to help address research

management or information service issues such as university rankings research evaluation or knowledge domain visualization This renewed and growing interest stems from significant improvements in the availability and accessibility of digital bibliographic data both citation and full text and of relevant computer technologies The former provides large amounts of data and the latter the necessary tools for researchers to conduct new types of large scale citation analysis even without special access to special data collections Exciting new developments are emerging this way in many aspects of citation analysis This book critically examines both theory and practical techniques of citation network analysis and visualization one of the two main types of citation analysis the other being evaluative citation analysis To set the context for its main theme the book begins with a discussion of the foundations of citation analysis in general including an overview of what can and what cannot be done with citation analysis Chapter 1 An in depth examination of the generally accepted steps and procedures for citation network analysis follows including the concepts and techniques that are associated with each step Chapter 2 Individual issues that are particularly important in citation network analysis are then scrutinized namely field delineation and data sources for citation analysis Chapter 3 disambiguation of names and references Chapter 4 and visualization of citation networks Chapter 5 Sufficient technical detail is provided in each chapter so the book can serve as a practical how to guide to conducting citation network analysis and visualization studies While the discussion of most of the topics in this book applies to all types of citation analysis the structure of the text and the details of procedures examples and tools covered here are geared to citation network analysis rather than evaluative citation analysis This conscious choice was based on the authors observation that compared to evaluative citation analysis citation network analysis has not been covered nearly as well by dedicated books despite the fact that it has not been subject to nearly as much severe criticism and has been substantially enriched in recent years with new theory and techniques from research areas such as network science social network analysis or information visualization Table of Contents Acknowledgment Dedications Foundations of Citation Analysis Conducting Citation Network Analysis Steps Concepts Techniques and Tools Field Delineation and Data Sources for Citation Analysis Disambiguation in Citation Network Analysis Visualization of Citation Networks Appendix 3 3 Appendix 5 4 2 Bibliography Author Biographies

*Write a PhD in Biological Sciences* John Measey, 2021-11-29 You don't have to be a genius to write a PhD. Of course it will always involve a lot of hard work and dedication but the process of writing is a whole lot easier if you understand the basic ground rules. This book is a guide through the dos and don'ts of writing a PhD. It will be your companion from the point when you decide to do a PhD providing practical guidance to getting started all the way through the nuts and bolts of the writing and editing process. It will also help you to get and stay in the right mental framework and establish good habits from the beginning putting you in a commanding position later on. Examples are tailored to the biological sciences offering a unique reference for PhD students in these disciplines. Embarking on a PhD doesn't need to be daunting even if it's your first experience working within academia. Each short section focuses on writing considered by many to be the most difficult aspect of a PhD and delves into a practical detail of one aspect from the title to the supplementary material. Whether you're a student just starting your studies an early career researcher or a supervisor struggling to cope the book provides the insider information you need to get ahead.

**Cite Right, Second Edition** Charles Lipson, 2011-05-15 In his bestselling guide *Doing Honest Work in College: How to Prepare Citations, Avoid Plagiarism, and Achieve Real Academic Success* veteran teacher Charles Lipson brought welcome clarity to the principles of academic honesty as well as to the often murky issues surrounding plagiarism in the digital age. Thousands of students have turned to Lipson for no-nonsense advice on how to cite sources properly and avoid plagiarism when writing their research papers. With his latest book *Cite Right* Lipson once again provides much needed counsel in a concise and affordable handbook for students and researchers. Building on *Doing Honest Work in College* Lipson's new book offers a wealth of information on an even greater range of citation styles and details the intricacies of many additional kinds of sources. Lipson's introductory essay *Why Cite* explains the reasons it is so important to use citations and to present them accurately in research writing. In subsequent chapters Lipson explains the main citation styles students and researchers are likely to encounter in their academic work: Chicago, MLA, APA, CSE, biological sciences, AMA, medical sciences, ACS, chemistry, mathematics, and computer science, physics, astrophysics, and astronomy, Bluebook and ALWD law, and AAA, anthropology, and ethnography. His discussions of these styles are presented simply and clearly with examples drawn from a wide range of source types crossing all disciplines from the arts and humanities to science, law, and medicine. Based on deep experience in the academic trenches *Cite Right* is an accessible one-stop resource, a must-have guide for students and researchers alike who need to prepare citations in any of the major disciplines and professional studies.

**Decision Making and Problem Solving in Organizations: Assessing and Expanding the Carnegie Perspective** Daniella Laureiro Martinez, Pino Audia, Daniel A. Newark, 2024-09-04 Within the broader study of decision making the Carnegie perspective occupies a unique place. Initially developed by pioneering scholars such as Herbert Simon and James March, it views organizational decisions as resulting from the combined influences of psychological processes of attention allocation, interpretation of experience, and motivated search, and features of the organizational context that direct attention.

influence preferences contend with ambiguity contain conflict and divide labor Despite its unique strengths and a considerable body of work see below some foundational references research that adopts the Carnegie perspective is still relatively unknown outside the field of organization studies As James March noted Carnegie has been primarily an importer of ideas rather than an exporter The goal of this research topic is to facilitate dialogue and integration between this well established Carnegie perspective and other lines of inquiry into the study of decision making and problem solving We are interested in bringing to the fore what is distinctive in the accumulated body of evidence produced by the Carnegie perspective and highlighting similarities differences and potential points of connection with other research done on similar topics To achieve this goal we hope that the front end of each submission will cover the following four components
