

A BILLION DOLLAR

more. It's a multi-billion dollar industry. Any shark is taken regardless of age, size, or species.

MILLIONS OF ENCOUNTERS PER YEAR...

Each year around the world there are about 70 confirmed shark attacks, only 3 of which on average result in death. The numbers of attacks have risen over the past several decades, but not because sharks are more aggressive. Humans have simply taken to coastal waters in increasing numbers.

ANNUAL HUMAN DEATHS RESULTING FROM:

Sharks	3
Elephants/ Tigers	200
Execution	2,400
Illegal Drugs	22,000
Road Accidents	1,200,000
Starvation	8,000,000

"MAN EATER" IS A MISNOMER...

Sharks are known as eating machines. But because many species are cold blooded, some sharks eat only about 2 percent of their body weight each day. (That's a lot less than humans typically eat.) There is no record of a shark eating a person whole.

70-100 ATTACKS

5 FATALITIES

FACING EXTINCTION...

While sharks kill fewer than 15 people a year, their own numbers suffer greatly at human hands. Between 20 and 100 million sharks die each year due to fishing activity, according to data from the Florida Museum of Natural History's International Shark Attack File. The organization estimates that many shark populations have plummeted 30 to 50 percent.

THE BIGGER PICTURE: ECOLOGICAL IMPACT...

Sharks take anything from 7 to over 20 years to reach maturity, meaning that it takes populations a long time to recover; the current demand for their fins makes it impossible for their populations to fully return to previous levels. Sharks are top predators - when they are removed from the oceans, the entire eco-system suffers.
