Frontiers in Offshore Geotechnics Susan Gourvenec, Mark Cassidy, 2005-10-13. This book addresses current and emerging challenges facing those working in offshore construction design and research. Keynote papers from leading industry practitioners and academics provide a comprehensive overview of central topics covering deepwater anchoring, pipelines, foundation solutions for offshore wind turbines, site investigation, geoh. *Nonlinear Stochastic Mechanics* Nicola Bellomo, Fabio Casciati, 2012-12-06. The Symposium held in Torino ILSI Villa Gualino July 1-5, 1991 is the sixth of a series of IUTAM Symposia on the application of stochastic analysis to continuum and discrete mechanics. The previous one held in Innsbruck 1987 was mainly concentrated on qualitative and quantitative analysis of stochastic dynamical systems as well as on bifurcation and transition to chaos of deterministic systems. This Symposium concentrated on fundamental aspects: stochastic analysis and mathematical methods on specific applications in various branches of mechanics, engineering and applied sciences as well as on related fields as analysis of large systems, system identification, earthquake prediction. Numerical methods suitable to provide quantitative results, say stochastic finite elements, approximation of probability distribution and direct integration of differential equations have also been the object of interesting presentations. Specific topics of the sessions have been: Engineering Applications, Equivalent Linearization of Discrete Stochastic Systems, Fatigue and Life Estimation, Fluid Dynamics, Numerical Methods, Random Vibration, Reliability Analysis, Stochastic Differential Equations, System Identification, Stochastic Control. We are indebted to the IUTAM Bureau for having promoted and sponsored this Symposium and the Scientific Committee for having collaborated to the selection of participants and lecturers as well as to a prompt reviewing of the papers submitted for publication into these proceedings. A special thank is due to Frank Kozin: the organization of this meeting was for him very important; he missed the meeting but his organizer ability was present. *Collaboration and Technology* Adriana S. Vivacqua, Carl Gutwin, Marcos R.S. Borges, 2011-09-09. This book constitutes the proceedings of the 17th Collaboration Researchers International Working Group Conference on Collaboration and Technology held in Paraty, Brazil, in October 2011. The 12 revised papers presented together with 6 short papers were carefully reviewed and selected from numerous submissions. They are grouped into four themes that represent current areas of interest in groupware research: theoretical, foundation, empirical studies, methods and techniques, and tools for communication and cooperation.
