 Observational Astrophysics It presents a synthesis on tools and methods of observational astrophysics of the early 21st
 century Written specifically for astrophysicists and graduate students this textbook focuses on fundamental and sometimes
 practical limitations on the ultimate performance that an astronomical system may reach rather than presenting particular
 systems in detail In little more than a decade there has been extraordinary progress in imaging and detection technologies in
 the fields of adaptive optics optical interferometry in the sub millimetre waveband observation of neutrinos discovery of
 exoplanets to name but a few examples The work deals with ground based and space based astronomy and their respective
 fields And it also presents the ambitious concepts behind space missions aimed for the next decades Avoiding particulars it
 covers the whole of the electromagnetic spectrum and provides an introduction to the new forms of astronomy becoming
 possible with gravitational waves and neutrinos It also treats numerical aspects of observational astrophysics signal

 Urama, 2008-01-01 This is the first scholarly collection of articles focused on the cultural astronomy of Africans It weaves
 together astronomy anthropology and Africa and it includes African myths and legends about the sky alignments to celestial
 bodies found at archaeological sites and at places of worship rock art with celestial imagery and scientific thinking revealed
 in local astronomy traditions including ethnomathematics and the creation of calendars Authors include astronomers Kim
 Malville Johnson Urama and Thebe Medupe archaeologist Felix Chami and geographer Michael Bonine and many new
 authors As an emerging subfield of cultural astronomy African cultural astronomy researchers are focused on training
 students specifically for doing research in Africa The first part of the volume contains lessons and exercises to help the
 beginning student of African cultural astronomy Included are exercises in archaeoastronomy cultural anthropology and
 naked eye astronomy penned by authors who use these regularly use these methods for their research This collection of
 lessons and research papers provides a foundation for the cultural astronomy researcher interested in doing work in Africa
