**Forestry Economics** John E. Wagner, 2023-12-22 Forestry Economics introduces students and practitioners to the economics of managing forests and forest enterprises. The book adopts the approach of managerial economics textbooks and applies this to the unique problems and production processes faced by managers of forests and forest enterprises. What many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions. John E. Wagner draws on his 30 years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers. The second edition has been updated to include Expanded discussion of compounding, discounting and capital budgeting as well as an expanded discussion of when to replace a capital asset that has i) costs but no direct revenue stream such as a machine ii) costs and a direct annual revenue stream such as a solar array or iii) costs and a periodic revenue stream illustrated by the forest rotation problem. New practical examples to provide students with applications of the concepts being discussed in the text, most notably on New Zealand and a Radiata Pine (*Pinus radiata*) Plantation. A brand new chapter that develops business plans for for-profit businesses to illustrate how a business plan is derived from the economic information contained within the Architectural Plan for Profit and how it can be used to make business decisions about continuing to operate a business or to start a new business. This textbook is an invaluable source of clear and accessible information on forestry economics and management not only for economics students but also for students of other disciplines and those already working in forestry and natural resources. **Systems Intelligence in Leadership and Everyday Life** Raimo P. Härmäläinen, Esa Saarinen, 2007 [Probabilistic Methods for Financial and Marketing Informatics](#) Richard E. Neapolitan, Xia Jiang, 2010-07-26 Probabilistic Methods for Financial and Marketing Informatics aims to provide students with insights and a guide explaining how to apply probabilistic reasoning to business problems. Rather than dwelling on rigor, algorithms and proofs of theorems, the authors concentrate on showing examples and using the software package Netica to represent and solve problems. The book contains unique coverage of probabilistic reasoning topics applied to business problems including marketing, banking, operations management and finance. It shares insights about when and why probabilistic methods can and cannot be used effectively. This book is recommended for all R & D professionals and students who are involved with industrial informatics that is applying the methodologies of computer science and engineering to business or industry information. This includes computer science and other professionals in the data management and data mining field whose interests are business and marketing information in general and who want to apply AI and probabilistic methods to their problems in order to better predict how well a product or service will do in a particular market. For instance, typical fields where this technology is used are in advertising, venture capital, decision making, operational risk measurement in any industry, credit scoring and investment science.
