

### Example 1

Calculate the  $K_a$  value of a 0.03 M aqueous solution of hydrofluoric acid (HF) with a pH of 2.75.

	HF	H <sub>2</sub> O	→	F <sup>-</sup>	H <sub>3</sub> O <sup>+</sup>
I	0.03	~		0	0
C	-x			+x	+x
E	0.03-x			+x	+x

pH = 2.75

$$[\text{H}_3\text{O}^{+}] = 10^{-2.75} = 1.8 \times 10^{-3} \text{ M}$$

$$[\text{F}^{-}] = 1.8 \times 10^{-3} \text{ M}$$

$$K_a = \frac{[\text{products}]}{[\text{reactants}]} = \frac{[\text{F}^{-}][\text{H}_3\text{O}^{+}]}{[\text{HF}]}$$

$$K_a = \frac{(x)(x)}{(0.03-x)} = \frac{x^2}{(0.03-x)}$$

$$K_a = \frac{(1.8 \times 10^{-3})^2}{(0.03 - (1.8 \times 10^{-3}))} = 1 \times 10^{-4}$$

Spencer, 2023-07-03 The Encyclopedia of Physical Chemistry and Chemical Physics introduces possibly unfamiliar areas explains important experimental and computational techniques and describes modern endeavors The encyclopedia quickly provides the basics defines the scope of each subdiscipline and indicates where to go for a more complete and detailed explanation Particular attention has been paid to symbols and abbreviations to make this a user friendly encyclopedia Care has been taken to ensure that the reading level is suitable for the trained chemist or physicist The encyclopedia is divided in three major sections FUNDAMENTALS the mechanics of atoms and molecules and their

interactions the macroscopic and statistical description of systems at equilibrium and the basic ways of treating reacting systems The contributions in this section assume a somewhat less sophisticated audience than the two subsequent sections At least a portion of each article inevitably covers material that might also be found in a modern undergraduate physical chemistry text METHODS the instrumentation and fundamental theory employed in the major spectroscopic techniques the experimental means for characterizing materials the instrumentation and basic theory employed in the study of chemical kinetics and the computational techniques used to predict the static and dynamic properties of materials APPLICATIONS specific topics of current interest and intensive research For the practicing physicist or chemist this encyclopedia is the place to start when confronted with a new problem or when the techniques of an unfamiliar area might be exploited For a graduate student in chemistry or physics the encyclopedia gives a synopsis of the basics and an overview of the range of activities in which physical principles are applied to chemical problems It will lead any of these groups to the salient points of a new field as rapidly as possible and gives pointers as to where to read about the topic in more detail

### Multiple Representations in Chemical Education John K. Gilbert, David

Treagust, 2009-02-28 Chemistry seeks to provide qualitative and quantitative explanations for the observed behaviour of elements and their compounds Doing so involves making use of three types of representation the macro the empirical

properties of substances the sub micro the natures of the entities giving rise to those properties and the symbolic the number of entities involved in any changes that take place Although understanding this triplet relationship is a key aspect of chemical education there is considerable evidence that students find great difficulty in achieving mastery of the ideas involved In bringing together the work of leading chemistry educators who are researching the triplet relationship at the secondary and university levels the book discusses the learning involved the problems that students encounter and successful approaches to teaching Based on the reported research the editors argue for a coherent model for understanding the triplet relationship in chemical education
