Kaiser Table Of Allowances 2014:

The Affordable Care Act as a National Experiment Harry P. Selker, June S. Wasser, 2013-09-05 This book examines the landmark 2010 Patient Protection and Affordable Care Act ACA from the perspective of health policy research as translational science. It delineates a new perspective about the creation and potential impact of the ACA and guides the development of health policy that is supported by best evidence that in turn transforms into practice policy and public benefit. Told by those involved in the creation and implementation of the ACA, the book reviews the history and impact of this ground-breaking legislation and recommends priorities, objectives, and next steps for translational research as the ACA is implemented. The book includes coverage of these topics: Objectives of the ACA; Analysis of data collected from healthcare reform programs in Vermont and Massachusetts to inform national implementation of the ACA; Engaging the public in and building support for ACA implementation; Interplay of federal, state, and local healthcare policy decisions arising from the enforcement of the ACA; Featuring contributions from nationally renowned leaders in healthcare policy, this book adds to the public conversation about the ACA and its role in shaping health policy and contributes to a more realistic, nuanced, and productive understanding of this landmark legislation by physicians, policy makers, and the public. It also provides a framework for next steps in continuing to improve U.S. health policy.

Stratospheric Ozone Damage and Legal Liability Lisa Elges, 2016-12-19 While government enforcement of laws and regulations to control the production of chlorofluorocarbons in 1987 has been hailed as exemplifying the precautionary principle for almost two decades, U.S. companies failed to take precautionary measures to prevent chemical emissions despite the probable risk of stratospheric ozone loss. As a result, human harms in the form of skin cancer have reached epidemic proportions globally and in the United States where today one person dies every hour from skin cancer. This book reviews U.S. laws, regulations, and policies as well as case law regarding similar toxic tort cases to consider whether companies can and should be held legally liable under tort, common law theories, and related tort justice theories for having contributed to increased risks of skin cancer.

EU Citizenship and Social Rights Frans Pennings, Martin Seeleib-Kaiser, 2018-03-30 In the 1990s the Maastricht Treaty introduced the right to free movement for EU citizens. In practice, however, there are substantial barriers to making use of this right, particularly to integration and to accessing the social and welfare rights available. This is particularly true when it comes to accessing social rights such as social assistance, housing, benefit, study grants, and health care. This book provides a detailed description and thorough analysis of these barriers in both law and practice.
