Tree Kangaroos ,2020-11-26 Tree Kangaroos Science and Conservation a volume in the Biodiversity of the World Conservation from Genes to Landscapes series provides an overview of tree kangaroo species and their relationship with humans This exciting interdisciplinary work on tree kangaroo science and conservation is divided into six major sections 1 tree kangaroo evolution genetics taxonomy ecology behavior and conservation status 2 current and emerging threats to the species 3 conservation programs in Australia and New Guinea with an emphasis on the human aspect of conservation 4 the role of zoos in conservation solutions 5 techniques and technologies to study this elusive marsupial and 6 what is needed to keep tree kangaroos and their landscapes healthy in the future The series on Biodiversity of the World Conservation from Genes to Landscapes includes titles focused on specific species or taxa across disciplinary boundaries and spatial scales from genes to landscapes Volumes are edited and written by prominent scholars and practitioners to illuminate and advance biodiversity science and conservation Includes coverage of all known tree kangaroo species Features contributions edited and written by the world s leading researchers and practitioners focusing on these scientifically mysterious marsupials Provides accessible scientific and general information to a wide audience including students academics researchers conservation professionals policy makers business leaders zoo professionals health professionals and people interested in community based conservation Presents the current knowledge of tree kangaroos helping to lay the foundations and best practices for future conservation and research in Australia and New Guinea      *Youngsters Solving Mathematical Problems with Technology* Susana Carreira,Keith Jones,Nélia Amado,Hélia Jacinto,Sandra Nobre,2016-02-19 This book contributes to both mathematical problem solving and the communication of mathematics by students and the role of personal and home technologies in learning beyond school It does this by reporting on major results and implications of the Problem Web project that investigated youngsters mathematical problem solving and in particular their use of digital technologies in tackling and communicating the results of their problem solving in environments beyond school The book has two focuses Mathematical problem solving skills and strategies forms of representing and expressing mathematical thinking technological based solutions and students and teachers perspectives on mathematics learning especially school compared to beyond school mathematics      Liberia and the Dialectic of Law Shane Chalmers,2018-05-16 It is the condition of modernity that an institution cannot depend on a god tradition or any other transcendental source to secure its foundations which thereby come to rest upon or rather in and through its subjects Never wholly separated from its subjects and yet never identical with them this contradictory condition provides a way of seeing how modern law gives form to life and how law takes form enlivened by its subjects By driving Theodor Adorno s dialectical philosophy into the concept of law the book shows how this contradictory condition enables law to become instituted in ways that are hostile to its subjects but also how law remains open to its

subjects and thus disposed towards transformation To flesh out an understanding of this contradiction the book examines the making and remaking of Liberia from its conception as an idea of liberty at the beginning of the nineteenth century to its reconstruction at the beginning of the twenty first with the assistance of an international intervention to establish a state based on the rule of law In so doing the book shows how law is at the epicentre of a colonising power in Liberia that renders subjects as mere objects but at the same time the book exposes the instability of this power by showing how law is also enlivened by its subjects as it takes form in and through their lives and interactions It is this fundamentally contradictory condition of law that ultimately denies power any absolute hold leaving law open to the self expression of its subjects

*Perilous Problems for Puzzle Lovers* Alex Bellos, 2020-10-27 Put your wits and survival instincts to the test Publisher's Note *Perilous Problems for Puzzle Lovers* was previously published in the UK under the title *So You Think You've Got Problems* In *Perilous Problems for Puzzle Lovers* Alex Bellos collects 125 of the world's greatest stumpers many dangerous to your person and all dangerous to your pride Brace yourself to wrestle with wordplay grapple with geometry and scramble for survival For example Ten lions and a sheep are in a pen Any lion who eats the sheep will fall asleep A sleeping lion will be eaten by another lion who falls asleep in turn If the lions are all perfect logicians what happens Bellos pairs his fiendish brainteasers with fascinating history so you'll meet Alcuin Sam Loyd and other puzzle masters of yore in between deranged despots and wily jailers with an unaccountable taste for riddles Will you make it out alive And what about the sheep

*Kangaroos* Terence J. Dawson, 2012 Appreciation of the diversity of kangaroos in Australia and their lifestyles Insight into the ecology of kangaroos as it pertains to conservation issues Provides an understanding of the historical evolution of a major group of Australian mammals This book provides a clear and accessible account of kangaroos showing how their reproductive patterns social structure and other aspects of their biology make them well adapted to Australia's harsh climate and demanding environment Since the last edition of this book nearly 20 years ago much more is now known about the biology and ecology of these iconic animals This completely revised edition describes these new perspectives and attempts to counter the many urban and rural myths that still exist

**One Welfare in Practice** Tanya Stephens, 2021-10-25 Animal welfare has long been recognised as central to the role of the veterinary professional but this is increasingly aligned with the welfare of humans and the broader environment in which we co exist This is the first book dedicated to the role of the veterinarian in One Welfare a concept that recognises the interconnections between animal welfare human wellbeing and the environment The book demonstrates through a wide range of international case studies why professional ethics and the use of good evidence is integral to this role Contributors bring a rich variety of writings each with their own perception of the role of the veterinarian in improving animal welfare and human wellbeing *One Welfare in Practice* The Role of the Veterinarian emphasises the importance of interdisciplinary collaboration and solutions it is essential that veterinary practitioners recognise when other professionals or disciplines need to be consulted to benefit both animals and humans

With its multiple fascinating approaches to One Welfare this book will inform and inspire the veterinarian to find areas where collaborative action reaps the greatest rewards This unique book shows how veterinarians can and are contributing to improving animal and human welfare offering practical advice as to how the profession can further engage in One Welfare in a range of settings *Kangaroos, Counting the Cost* Lucinda Mary Gibson, Michael Denis Young, 1988 **Design for the**

**Unthinkable World** Craig Bremner, Paul A. Rodgers, Giovanni Innella, 2024-02-13 This edited book contests that if design's raison d'être is to make things better then the object of design has always been remains and can only be a changed world and our relationship to it the world for us Each chapter was written by carefully selected researchers and practitioners who span geographical disciplinary and methodological boundaries in their work Contributors skilfully examine the case that while this once might have been seen to be a worthy objective how else to effect a preferred state and or pursue the project for the better world now the role of designing must cease to service design for change in the manner in which it has been doing Chapters explore how designing itself might change to explore the possibilities that might exist for the design of what might not become in an unthinkable world what Eugene Thacker calls a world without us This world without us does not mean a world devoid of humans or an interstellar world but a world we project that continues to revolve around the sun but no longer revolves around us This book will be of interest to scholars working in design research design ecology product design service design experience design architecture and information design **Obstetrics: Normal and Problem Pregnancies**

Macdonald, Katherine J. Willis, 2013-02-06 Following the much acclaimed success of the first volume of Key Topics in Conservation Biology this entirely new second volume addresses an innovative array of key topics in contemporary conservation biology Written by an internationally renowned team of authors Key Topics in Conservation Biology 2 adds to the still topical foundations laid in the first volume published in 2007 by exploring a further 25 cutting edge issues in modern biodiversity conservation including controversial subjects such as setting conservation priorities balancing the focus on species and ecosystems and financial mechanisms to value biodiversity and pay for its conservation Other chapters setting the framework for conservation address the sociology and philosophy of peoples relation with Nature and its impact on health and such challenging practical issues as wildlife trade and conflict between people and carnivores As a new development this second volume of Key Topics includes chapters on major ecosystems such as forests islands and both fresh and marine waters along with case studies of the conservation of major taxa plants butterflies birds and mammals A further selection of topics consider how to safeguard the future through monitoring reserve planning corridors and connectivity together with approaches to reintroduction and re wilding along with managing wildlife disease A final chapter by the editors synthesises thinking on the relationship between biodiversity conservation and human development Each topic is explored by a team of top international experts assembled to bring their own cross cutting knowledge to a penetrating synthesis of the issues from both theoretical and practical perspectives The interdisciplinary

nature of biodiversity conservation is reflected throughout the book Each essay examines the fundamental principles of the topic the methodologies involved and crucially the human dimension In this way Key Topics in Conservation Biology 2 like its sister volume Key Topics in Conservation Biology embraces issues from cutting edge ecological science to policy environmental economics governance ethics and the practical issues of implementation Key Topics in Conservation Biology 2 will like its sister volume be a valuable resource in universities and colleges government departments and conservation agencies It is aimed particularly at senior undergraduate and graduate students in conservation biology and wildlife management and wider ecological and environmental subjects and those taking Masters degrees in any field relevant to conservation and the environment Conservation practitioners policy makers and the wider general public eager to understand more about important environmental issues will also find this book invaluable

*What to Do with the Least of Our Brothers?* Fr. C. Ryan McCarthy, It seems at times unthinkable that a book like this would have to be written although I am relatively sure that Aldous Huxley foresaw its necessity when he wrote *Brave New World* But the time has arrived where babies are manufactured in sterile facilities and tested for their fitness for life in the world While we have not yet advanced sufficiently in biological sciences to entirely forego natural gestation in favor of prenatal programming process which Huxley describes we have reached the point where those unwanted embryos are set aside freeze dried and abandoned or destroyed when they do not meet the standard set for a child This book affirms the intrinsic goodness of the life of each embryo and explores from the Catholic perspective the possibility of frozen embryo rescue by adoption It looks at those arguments which see the elements of in vitro fertilization as so contrary to the faith and the natural law as to be irrecoverably intrinsically evil and rejects those in favor of a small and narrow path of adoption to fully re incorporate a child through the love of a mother and a father into the society which abandoned it
