Mentoring for the Professions Aimee Howley, Mary Barbara Trube, 2014-10-01 This edited volume brings together conceptual and empirical work from various

professional fields to inform a perspective on mentoring that goes beyond what is needed for today and orients toward what is needed for the future in order to promote healthy and productive organizations This perspective is important because the pace of change in organizations is rapid and increasingly so Under conditions of rapid and on going change employees students and colleagues all are learners and the learning needs of these adults demand meaningful and focused strategies for professional development A major strategy with demonstrated value for fostering learning among adults is mentoring which contributes both relational and structural support for such learning This support helps organizations build communities of practice in which colleagues alternate the role of mentor and mentee by sharing different types of expertise and different perspectives on organizational challenges Chapters within the book focus on theoretical perspectives on mentoring the connection between change and mentoring the character of the leadership that mentoring entails the developmental processes that mentees experience the transformation of the mentee as a result of mentoring the value of matching mentor and mentee styles and the role of mentoring in organizational team building Furthermore some chapters explore the similarities and differences in individual versus group mentoring And some of the contributions elaborate linkages among mentoring concepts and those used in related practices such as coaching and distributed leadership

Handbook of Inter-Rater Reliability, 4th Edition Kilem L. Gwet, 2014-09-07 The third edition of this book was very well received by researchers working in many different fields of research The use of that text also gave these researchers the opportunity to raise questions and express additional needs for materials on techniques poorly covered in the literature For example when designing an inter rater reliability study many researchers wanted to know how to determine the optimal number of raters and the optimal number of subjects that should participate in the experiment Also very little space in the literature has been devoted to the notion of intra rater reliability particularly for quantitative measurements The fourth edition of this text addresses those needs in addition to further refining the presentation of the material already covered in the third edition Features of the Fourth Edition include New material on sample size calculations for chance corrected agreement coefficients as well as for intraclass correlation coefficients The researcher will be able to determine the optimal number raters subjects and trials per subject The chapter entitled Benchmarking Inter Rater Reliability Coefficients has been entirely rewritten The introductory chapter has been substantially expanded to explore possible definitions of the notion of inter rater reliability All chapters have been revised to a large extent to improve their readability
