The authors of the DSM-5 have responded to this criticism by stating that the term "disorder" is used in a broad sense, encompassing both medical and psychological conditions. They argue that the use of the term "disorder" is necessary to distinguish between normal and abnormal behavior, and that it is not intended to imply a medical condition. The authors also state that the use of the term "disorder" is consistent with the language used in the ICD-10, which is the international standard for the classification of mental disorders.
