Communication and Language Elinor L. Brown, Alexander S. Yeung, Cynthia Lee, 2013-01-01

Communication and Language play a foundational role in the overall pursuit of equity and social justice in education This volume does not take up the majority and dominant views which are especially visible in developments in the field of linguistic education and English language instruction Rather it travels the path less followed to attend to the language and communication concerns of populations that possess little political and economic power and whose academic and social needs are often neglected The volume attends to the role of language acquisition in levelling the playing field to enable ALL students to develop into contented family members good neighbours and productive citizens in an increasingly diverse and global society The issue takes on far greater importance as it gradually comes to light that the capacity for language corresponds to and even implements the ability to interrelate with others Far from being a mere utilitarian tool this is now appreciated as constituting the realm of abilities to take the position of the other to share a field of meaning and to project and pursue truly humane and indeed inter humane attitudes and goals In this light communication and language whether verbal or preverbal constitute the field in which one first attains and progressively evolves one's humanity In this volume scholars from ten different countries examine issues related to the influence of language and communication patterns on

equity and social justice in the lives of disadvantaged and marginalized populations around the globe i e educational opportunities community stability economic prospects and political power Critical issues addressed include education in traditional national or Western languages language integration through dialects and code switching non verbal academic engagement through art signing and photography cross cultural engagement through language equity in higher education and the influence of Western language acquisition on the self concepts of disadvantaged students As the succession of sections in this volume makes clear success in the realization of language and communication abilities is not simple Rather it reflects human life and interaction in all its complexity

The Buddha Party John Powers,2017 The Buddha Party tells the story of how the People s Republic of China employs propaganda to define Tibetan Buddhist belief and sway opinion within the country and abroad The narrative they create is at odds with historical facts and deliberately misleading but John Powers argues it is widely believed by Han Chinese Most of China s leaders appear to deeply believe the official line regarding Tibet which resonates with Han notions of themselves as China s most advanced nationality and as a benevolent race that liberates and culturally uplifts minority peoples This in turn profoundly affects how the leadership interacts with their counterparts in other countries Powers s study focuses in particular on the government s patriotic education campaign an initiative that forces monks and nuns to participate in propaganda sessions and repeat official dogma Powers contextualizes this within a larger campaign to transform China s religions into patriotic systems that endorse Communist Party policies This book offers a powerful comprehensive examination of this ongoing phenomenon how it works and how Tibetans resist it Doing Ethnography Today Elizabeth
