Essentials of Healthcare Strategy and Performance Management James R. Langabeer, Tiffany Champagne-Langabeer, 2024-06-07 Leaders and healthcare organizations and students aspiring to become one should be asking themselves one thing in these financially challenging times: how can they maintain a strategic and competitive advantage over other players in their market? Some healthcare organizations have faced extremely poor financial performance in recent years, with data suggesting that up to 10% of hospitals will go bankrupt or face closure within the next 10 years. Yet little pragmatic evidence exists to offer insights into how to create better strategies to improve performance, build resiliency, and align stakeholders. Essentials of Healthcare Strategy and Performance Management explores the most critical components of business strategy and performance management for modern complex healthcare organizations. Using pragmatic and real-world evidence, this book provides essential briefings on key topics that every current or aspiring leader needs to know in order to better manage strategy and achieve improved performance in their hospital or health system. We will also specifically focus on implementation of strategy and best practices for some of the most important quality management techniques. We hope this book helps inspire leaders to be creative in formulating more effective competitive strategy.

Strategic Management and Economics in Health Care Michael Chletsos, Anna Saiti, 2020-01-01 This book offers significant managerial and economic knowledge on hospitals and will serve as a valuable tool for explaining complicated managerial and economical problems and for facilitating decision-making processes. It bridges management and economic sciences, two complementary sciences that feed the process of making rational decisions. With particular reference to the education, the main aim of this book is to provide students of relevant schools and departments with the knowledge, managerial and economic, that will enable them to deal both efficiently and effectively with the real problems arising in a health care organization such as a hospital. In particular, by equipping students with appropriate managerial and economic knowledge, the aim is to give them a clear understanding of HOW to deal with the diverse and complex problems of hospitals.

while at the same time helping them to develop strategic approaches that will make hospitals more efficient and sustainable
