Panetta, Katianne Williams, 2018-08-01 Maybe you have a daughter who loves cooking soccer and musicals Maybe she is a social butterfly an athlete a fashionista and a humanitarian who wants to change the world Be honest do you think Well she is clearly not a math and science kid Do you assume that certain classes and careers won't appeal to her Count Girls In challenges these assumptions and presents a totally different way of thinking there is a place for all girls and young women

not just the science fair winners and robotics club members in science technology engineering and math STEM fields if we can keep their and our minds and options open and meet them where they are To succeed in STEM fields today girls don't have to change who they are A girl who combines her natural talents interests and dreams with STEM skills has a greater shot than ever before at a career she loves and a salary she deserves Count Girls In encourages parents and other adults to raise authentic young women who have the confidence to put STEM to work in a way that best serves them and their passions The authors both STEM professionals present compelling research in a conversational accessible style and provide specific advice and takeaways for each stage of schooling from elementary school through college followed by comprehensive STEM resources This isn't a book about raising competitive test-acing girls in lab coats this is about raising happy confident girls who realize the world of opportunities before them *Daily Graphic* Kingsley Inkoom,2014-09-05 **Last Bell** Carl Bistany,Stephanie Gruner Buckley,2015-11-05 In the mid nineties the Alfred Glickman School was just another failing school in one of America's most violent cities Then SABIS a private for-profit education provider took over Twenty years later the school is a six-time silver medalist in U.S. News World Report's annual America's Best High Schools listing and every single graduate of the school has been offered a college place With success of this magnitude you would think that for-profit managed charter schools like SABIS would be in high demand On the contrary they are fought at every turn Why is the idea of employing for-profit companies to help rescue failing public schools treated with fear and hostility Stranger still why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake Last Bell is a book about politics money and power It examines the charge that for-profit running charter schools are in it for the money not the kids and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools Last Bell is a reasonable voice in a polarized debate It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future *Daily Graphic* Ransford Tetteh,2014-09-11 **Serious Games, Interaction, and Simulation** Carlos Vaz de Carvalho,Paula Escudeiro,António Coelho,2016-03-24 This volume constitutes the proceedings of the 5th International Conference on Serious Games Interaction and Simulation held in Novedrate Italy in September 2015 The 16 revised full papers together with 2 keynote papers were carefully reviewed and selected for inclusion in this book They focus on the design development use and application of games for purposes other than entertainment As such they cover areas like cognition psychology technology enhanced education evaluation and assessment multimedia and information technology and feature new scientific approaches and results from experiments and real life applications
