1970-1971 season. The first of these was the 1970-1971 season, when the total catch was 1,100 tons. This was a record for the fishery and was due to a combination of factors, including a high level of effort and a high level of catch per unit effort. The second of the two periods was the 1971-1972 season, when the total catch was 1,000 tons. This was also a high level of catch and was due to similar factors to those mentioned above.
