Transaction-Level Power Modeling Amr Baher Darwish,Magdy Ali El-Moursy,Mohamed Amin Dessouky,2019-08-01 This book describes for readers a methodology for dynamic power estimation using Transaction Level Modeling TLM The methodology exploits the existing tools for RTL simulation design synthesis and SystemC prototyping to provide fast and accurate power estimation using Transaction Level Power Modeling TLPM Readers will benefit from this innovative way of evaluating power on a high level of abstraction at an early stage of the product life cycle decreasing the number of the expensive design iterations Scientific and Technical Aerospace Reports ,1986 *School Shop* ,1985 *Low-Power CMOS Circuits* Christian Piguet,2018-10-03 The power consumption of microprocessors is one of the most important challenges of high performance chips and portable devices In chapters drawn from Piguet s recently published Low Power Electronics Design Low Power CMOS Circuits Technology Logic Design and CAD Tools addresses the design of low power circuitry in deep submicron technologies It provides a focused reference for specialists involved in designing low power circuitry from transistors to logic gates The book is organized into three broad sections for convenient access The first examines the history of low power electronics along with a look at emerging and possible future technologies It also considers other technologies such as nanotechnologies and optical chips that may be useful in designing integrated circuits The second part explains the techniques used to reduce power consumption at low levels These include clock gating leakage reduction interconnecting and communication on chips and adiabatic circuits The final section discusses various CAD tools for designing low power circuits This section includes three chapters that demonstrate the tools and low power design issues at three major companies that produce logic synthesizers Providing detailed examinations contributed by leading experts Low Power CMOS Circuits Technology Logic Design and CAD Tools supplies authoritative information on how to design and model for high performance with low power consumption in modern integrated circuits It is a must read for anyone designing modern computers or embedded systems **Low-Power Electronics Design** Christian Piguet,2018-10-03 The power consumption of integrated circuits is one of the most problematic considerations affecting the design of high performance

chips and portable devices The study of power saving design methodologies now must also include subjects such as systems on chips embedded software and the future of microelectronics Low Power Electronics Design covers all major aspects of low power design of ICs in deep submicron technologies and addresses emerging topics related to future design This volume explores in individual chapters written by expert authors the many low power techniques born during the past decade It also discusses the many different domains and disciplines that impact power consumption including processors complex circuits software CAD tools and energy sources and management The authors delve into what many specialists predict about the future by presenting techniques that are promising but are not yet reality They investigate nanotechnologies optical circuits ad hoc networks e textiles as well as human powered sources of energy Low Power Electronics Design delivers a complete picture of today s methods for reducing power and also illustrates the advances in chip design that may be commonplace 10 or 15 years from now

Percutaneous Coronary Intervention for Chronic Total Occlusion Stéphane

Rinfret,2022-11-23 The second edition of this essential text provides readers with a detailed guide to performing various percutaneous coronary intervention PCI techniques for treating coronary chronic total occlusion CTO PCI continues to be an effective procedure to help patients with this pathology with high success and low complications rates Chapters feature a step by step approach to relevant techniques and describe their potential pitfalls enabling the reader to develop a thorough understanding of how to perform those procedures successfully Details of the latest methods for angiography analysis and the management of ostial CTOs plus heavily revised chapters on topics such as contemporary device based antegrade dissection and the retrograde approach through septal and non septal collateral channels ensure that this Work remains the most up to date reference on the subject Percutaneous Intervention for Coronary Chronic Total Occlusion The Hybrid Approach represents a vital reference to assist practicing and trainee interventional cardiologist in learning these techniques Various examples are provided with a vast selection of still images and angiographic video loops to enable the reader become confident in applying these methodologies into their day to day clinical practice

Heavy-Duty Electric Vehicles

Shashank Arora,Alireza Tashakori Abkenar,Shantha Gamini Jayasinghe,Kari Tammi,2021-02-23 Heavy Duty Electric Vehicles From Concept to Reality presents a step by step design and development guide for heavy duty electric vehicles It also offers practical insights based on the commercial application of an electric city bus Heavy duty electric vehicle design is challenging due to a lack of clear understanding of the government policies R D directions and uncertainty around the performance of various subsystems in an electric powertrain Therefore this book discusses key technical aspects of motors power electronics batteries and vehicle control systems and outlines the system integration strategies necessary for design and safe operation of electric vehicles in practice This comprehensive book serves as a guide to engineers and decision makers involved in electric vehicle development programs and assists them in finding the suitable electric powertrain solution for a given heavy duty vehicle application Offers an overview of various standards and regulations that guide the

electric vehicle design process and a comprehensive discussion on various government policies and incentive schemes propelling the growth of heavy electric vehicle markets across the world Provides a comparative evaluation of different electric drivetrain concepts and a step by step power calculation guide for heavy duty electric powertrain Explains material selection and manufacturing methods for next generation batteries Discusses key elements and design rules for creating a robust high voltage energy storage system appropriate packaging and its support systems including charging network Includes a concise description of torque mapping power management and fault handling strategies for inverter drive and control systems Features case studies to better understand complex topics like charging system requirements and vehicle control system diagnostics

Advances in Intelligent Computing De-Shuang Huang,Xiao-Ping Zhang,Guang-Bin Huang,2005-09-16 The International Conference on Intelligent Computing ICIC was set up as an annual forum dedicated to emerging and challenging topics in the various aspects of advances in computational intelligence fields such as artificial intelligence machine learning bioinformatics and computational biology etc The goal of this conference was to bring together researchers from academia and industry as well as practitioners to share ideas problems and solutions related to the multifaceted aspects of intelligent computing This book constitutes the proceedings of the International Conference on Intelligent Computing ICIC 2005 held in Hefei Anhui China during August 23 26 2005 ICIC 2005 received over 2000 submissions from authors in 39 countries and regions Based on rigorous peer reviews the Program Committee selected 563 high quality papers for presentation at ICIC 2005 of these 215 papers were published in this book organized into 9 categories and the other 348 papers were published in five international journals The organizers of ICIC 2005 made great efforts to ensure the success of this conference We here thank the members of the ICIC 2005 Advisory Committee for their guidance and advice the members of the Program Committee and the referees for reviewing the papers and the members of the Publication Committee for checking and compiling the papers We would also like to thank the publisher Springer for their support in publishing the proceedings in the Lecture Notes in Computer Science series Particularly we would like to thank all the authors for contributing their papers
