

When a business is owned by more than one person, they do not necessarily own equal portions.

Ex: Michelle invests \$15,000 in a partnership that has four other partners. The total investment of all partners is \$240,000. What percent of the business does Michelle own?

$$\frac{15,000}{240,000} = \frac{15}{240} = .0625 = 6.25\%$$

Ex2: The total number of shares of stock in the Bulls Corporation is 650,000. Mike owns 12% of the shares. How many shares of Bulls Corporation stock does he own?

Geometrical Properties

Of Differential Equations: Applications Of The Lie Group Analysis In Financial Mathematics Ljudmila A

Bordag, 2015-05-27 This textbook is a short comprehensive and intuitive introduction to Lie group analysis of ordinary and partial differential equations This practical oriented material contains a large number of examples and problems accompanied by detailed solutions and figures In comparison with the known beginner guides to Lie group analysis the book is oriented toward students who are interested in financial mathematics mathematical finance and economics We provide the results of the Lie group analysis of actual models in Financial Mathematics using recent publications These models are usually formulated as nonlinear partial differential equations and are rather difficult to make use of With the help of Lie group analysis it is possible to describe some important properties of these models and to obtain interesting reductions in a clear and understandable algorithmic way The book can serve as a short introduction for a further study of modern geometrical analysis applied to models in financial mathematics It can also be used as textbook in a master's program in an intensive compact course or for self study The textbook with a large number of examples will be useful not only for students who are interested in Financial Mathematics but also for people who are working in other areas of research that are not directly connected with Physics for instance in such areas of Applied Mathematics like mathematical economy bio systems coding theory etc
