Nanoparticles in Fingerprinting Kumud Kant Awasthi, Mahipal Singh Sankhla, Chandra Shekhar Yadav, Anjali Awasthi, 2025-10-21 The toolkit of nanomaterials covered in this new book which ranges from magnetic nanoparticles to quantum dots offers up new possibilities for the preservation and visualization of latent prints and turns forensic science into an area where the unseen is made strikingly visible This volume acts as a thorough guide through experimental procedures theoretical underpinnings and practical uses of nanoparticle based fingerprinting Additionally it examines the potential challenges future directions and ethical considerations associated with the adoption of nanoparticle based fingerprinting methods The volume investigates fingerprinting techniques that involve titanium dioxide nanoparticles fluorescent nanoparticles gold and silver nanoparticles green synthesis of nanoparticles iron oxide nanoparticles carbon dots CDs and cadmium selenide CdSe nanoparticles and more The multidisciplinary approach taken by this book fosters a comprehensive knowledge of this cutting edge topic by reflecting the joint work of specialists from chemistry forensic science and nanoscience Contributions from leading experts in the fields of nanotechnology and forensic science enrich this volume with diverse perspectives and practical insights Whether you are a seasoned forensic professional a researcher in materials science or a student exploring the intersections of nanotechnology and criminalistics this book aims to serve as a definitive resource on the transformative role of nanoparticles in advancing fingerprint analysis

Advanced Chromatographic and Electromigration Methods in BioSciences I. Mikšík, F. Tagliaro, E. Tesarová, Z. Deyl, 1998-09-28 This book deals with chromatographic and electrophoretic methods applied for the separation quantitation and identification of biologically relevant compounds It is assumed that the potential reader is familiar with the basics of chromatographic and electromigration methods Individual separation modes are dealt with to an extent which follows their applicability for biomedical purposes liquid chromatography and electromigration methods are therefore highlighted Each chapter is completed with a list of recent literature covering the 1987 1997 period which can be used for further guidance of the reader

in his/her own field. The chapters have been written by specialists in a particular area and with an emphasis on applications to the biomedical field. This implies that theoretical and instrumental aspects are kept to a minimum which allows the reader to understand the text. Considerable attention is paid to method selection, detection and derivatization procedures and troubleshooting. The majority of examples given represent the analyses of typical naturally occurring mixtures. Adequate attention is paid to the role of the biological matrix and sample pretreatment and special attention is given to forensic, toxicological and clinical applications. The book is completed with an extensive Index of Compounds Separated.
