Patient-Centered Care for Pharmacists Kimberly A. Galt,Galt,2012-02-20 Patient centered care is at the heart of today s pharmacy practice and

ASHP's Patient Centered Care for Pharmacists gets to the heart of the subject. Formerly Developing Clinical Practice Skills for Pharmacists, this revised resource has been redeveloped to compliment the changing emphasis in pharmacy practice to patient centered care and the contemporary context of healthcare delivery. To understand and treat the whole person and learn to use a realistic approach to time and resources, students must connect their drug science knowledge to actual practice. Useful in multiple courses in multiple levels, Patient Centered Care for Pharmacists is a valuable resource that gives students and teachers alike more for their money. In P1, P2, and P3 courses in areas from clinical skills to communications, students can follow realistic case studies through typical processes to witness patient centered care in action. Strongly developed case studies provide insight into today's vital topics: Cultural differences among patients, Documentation and health records, Patient care plan development, Effective patient communication, And much more.

Writing, Reading, and Understanding in Modern Health Sciences Milos Jenicek, 2017-07-27. Medical articles are one of the main vehicles of knowledge translation and evidence communication in the health sciences. Their correct structure and style alone are no longer enough to convey a clear understanding of the intended message. Readers must be able to understand the very essence of the article message. That is the purpose of this book. Writing, Reading, and Understanding in Modern Health Sciences: Medical Articles and Other Forms of Communication will help the authors of medical articles communicate more effectively in today's practice and health research environment. It explores the most effective practices for communicating using three main medical literature formats: through scientific articles, articles where the subject is not based on the practice of the scientific method, and business reports. Describing how to think beyond the prevailing IMRAD article format, this book focuses on the nature, content, domains of thought, and meanings of medical articles. The ideas and underlying propositions in this book are complementary to specific requirements appropriate for each type of medical journal. After reading this book, you will better understand: How to write what is considered the most important type of medical article, the research-based medical article; How to write an evidence-based argumentative medical article; The challenges of clinical case reporting; The general framework of medical and research ethics; Classification of medical articles and their underlying studies from the causal standpoint; Supplying you with the understanding required to write more effective medical articles, the book includes details about essay-type articles, research-based articles, thesis as introduction sections, definitions as part of the material and methods sections, modern argumentation and critical thinking, underlying results and their discussion, and conclusions about them.

Laboratory Exercises for Sensory Evaluation Harry T. Lawless, 2012-12-12. Laboratory exercises are a necessary part of science education. They enable students to better understand the principles discussed in lectures and provide them with hands-on experience of the practical aspects of scientific research. The purpose of this book is to provide students and instructors with a time-tested set of lab exercises that illustrate the common sensory tests and/or sensory principles used in evaluation of foods, beverages, and consumer products. The appendices will also include a set of simple problem sets that can

be used to teach and reinforce basic statistical tests Approximately twenty years ago the Sensory Evaluation Division of the Institute of Food Technologists sponsored the preparation of a set of exercises titled Guidelines for Laboratory Exercises for a Course in Sensory Evaluation of Foods edited by one of the co authors Heymann This book will provide additional materials from the second author Lawless as well as other instructors in a uniform format that can be easily adopted for course use Most importantly the lab exercises will complement the flagship textbook in the field Sensory Evaluation of Foods Principles and Practices 2E also by Lawless and Heymann and published by Springer Possible course adoption of the main text along with the lab manual should enhance the sales of these materials
