integrated networks modelling and simulation This makes the book a valuable resource for researchers engineers and students alike *Multiagent Systems* Magdi S. Mahmoud,2020-03-20 Multiagent systems MAS are one of the most exciting and the fastest growing domains in the intelligent resource management and agent oriented technology which deals with modeling of autonomous decisions making entities Recent developments have produced very encouraging results in the novel approach of handling multiplayer interactive systems In particular the multiagent system approach is adapted to model control manage or test the operations and management of several system applications including multi vehicles microgrids multi robots where agents represent individual entities in the network Each participant is modeled as an autonomous participant with independent strategies and responses to outcomes They are able to operate autonomously and interact pro actively with their environment In recent works the problem of information consensus is addressed where a team of vehicles communicate with each other to agree on key pieces of information that enable them to work together in a coordinated fashion The problem is challenging because communication channels have limited range and there are possibilities of fading and dropout The book comprises chapters on synchronization and consensus in multiagent systems It shows that the joint presentation of synchronization and consensus enables readers to learn about similarities and differences of both concepts It reviews the cooperative control of multi agent dynamical systems interconnected by a communication network topology Using the terminology of cooperative control each system is endowed with its own state variable and dynamics A fundamental problem in multi agent dynamical systems on networks is the design of distributed protocols that guarantee consensus or synchronization in the sense that the states of all the systems reach the same value It is evident from the results that research in multiagent systems offer opportunities for further developments in theoretical simulation and implementations This book attempts to fill this gap and aims at presenting a comprehensive volume that documents theoretical aspects and practical applications *Advanced Hybrid Information Processing* Shuai Liu,Liyun Xia,2021-01-28 This two volume set constitutes the post conference proceedings of the 4th EAI International Conference on Advanced Hybrid Information Processing ADHIP 2020 held in Binzhou China in September 2020 Due to COVID 19 the conference was held virtually The 89 papers presented were selected from 190 submissions and focus on theory and application of hybrid information processing technology for smarter and more effective research and application The theme of ADHIP 2020 was Industrial applications of aspects with big data The papers are named in topical sections as follows Industrial application of multi modal information processing Industrialized big data processing Industrial automation and intelligent control Visual information processing **Foundations and Frontiers in Computer, Communication and Electrical Engineering** Aritra Acharyya,2016-05-05 The 3rd International Conference on Foundations and Frontiers in Computer Communication and Electrical Engineering is a notable event which brings together academia researchers engineers and students in the fields of Electronics and Communication Computer and Electrical Engineering making the conference a perfect platform to share
