Psychosocial Perspectives on Peacebuilding Brandon Hamber, Elizabeth Gallagher, 2014-11-04 The book *Psychosocial Perspectives on Peacebuilding* offers a template for those dealing with the aftermath of armed conflict to look at peacebuilding through a psychosocial lens This Volume and the case studies that are in it starts from the premise that armed conflict and the political violence that flows from it are deeply contextual and that in dealing with the impact of armed conflict context matters The book argues for a conceptual shift in which psychosocial practices are not merely about treating individuals and groups with context and culturally sensitive methods and approaches the contributors argue that such interventions and practices should in themselves shape social change This is of critical importance because the psychosocial method continually highlights how the social context is one of the primary causes of individual psychological distress The chapters in this book describe experiences within very different contexts including Guatemala Jerusalem Indian Kashmir Mozambique Northern Ireland South Africa and Sri Lanka The common thread between the case studies is that they each show how psychosocial interventions and practices can influence the peacebuilding environment and foster wider social change *Psychosocial Perspectives on Peacebuilding* is essential reading for social and peace psychologists as well as for students and researchers in the field of conflict and peace studies and for psychosocial practitioners and those working in post conflict areas for NGO s

Unfinished Business Tamim Bayoumi, 2017-09-19 A penetrating critique tracing how under regulated trading between European and U S banks led to the 2008 financial crisis with a prescription for preventing another meltdown There have been numerous books examining the 2008 financial crisis from either a U S or European perspective Tamim Bayoumi is the first to explain how the Euro crisis and U S housing crash were in fact parasitically intertwined Starting in the 1980s Bayoumi outlines the cumulative policy errors that undermined the stability of both the European and U S financial sectors highlighting the catalytic role played by

European mega banks that exploited lax regulation to expand into the U S market and financed unsustainable bubbles on both continents U S banks increasingly sold sub par loans to under regulated European and U S shadow banks and when the bubbles burst the losses whipsawed back to the core of the European banking system A much needed fresh look at the origins of the crisis Bayoumi s analysis concludes that policy makers are ignorant of what still needs to be done both to complete the cleanup and to prevent future crises Territorial Disputes in the South China Sea J. Huang,A.

Billo,2014-12-09 Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved complex territorial disputes This volume offers detailed insights into a range of country perspectives addressing the historical legal structural regional and multilateral dimensions of these disputes *Planning and Design for Sustainable Urban Mobility* Un-Habitat,2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change **CTET Success Master Social Science/Studies Paper-2 for Class 6 to 8 2020** Arihant Experts,2020-01-02 Throughout the world teaching is looked at as one of the most respected and noble profession a person could have A great teacher not only shows the right path that a student should follow but also prepares the human resources for the further development of the nation Among various exams CTET is the most popular teaching exam in the country Central Teaching Eligibility Test CTET is a national level test conducted by CBSE twice a year to recruit the eligible candidates as teacher The exam is conducted

The Transport Debate Jon Shaw, Iain Docherty, 2014-01-07 At a time when transport is high on the political agenda and government decision making is being vigorously scrutinised there is a need for an incisive and accessible analysis of the key policy issues This book is a highly readable introduction to the transport debate from two experts in the field The authors celebrate the advantages of a modern transport system but argue that years of poorly

conceived and executed transport policy have resulted in Britain's transport system being far worse than it should be. They show that a substandard transport system creates economic, social and environmental costs but demonstrate how these can be addressed through affordable and politically deliverable changes. Using a refreshingly novel approach, Shaw and Docherty use the familiar idea of the journey as the basis for their discussion. The book follows members of the Smith family as they uncover a wide array of transport issues including why the problems we all encounter as we travel around actually come about, which policy trade-offs were responsible for creating them in the first place, what impacts we all have to suffer as a result and what we can do to fix them. This lively and engaging approach will make the book ideal for a wide readership.

Women and Photography in Apartheid South Africa Marie Meyerding, 2025-04-29. Tracing the lives and works of five women in four case studies, author Marie Meyerding examines the representation of women in the field of photography in South Africa in the second half of the twentieth century. All of them are critically understudied with no existing scholarship dedicated exclusively to their photographic contributions. Focusing on the representation of women on two different levels as agents behind the camera and as subjects in photographs, it showcases women photographers portraying their female contemporaries and analyses to what extent they adhered to or subverted common forms of gender representation. In recuperating their forgotten archives, the book argues that none of these women are marginal figures but rather that each of them played a leading role in the field of photography in their own time. The book will be of interest to scholars working in art history, history of photography, gender studies, intersectionality and African studies. The Blue Commons Guy

Standing, 2022-07-07. A FINANCIAL TIMES BEST ECONOMICS BOOK OF 2022. A landmark book, *The Blue Commons* is at once a brilliant synthesis, a searing analysis and an inspiring call to action. David Bollier. With remarkable erudition, passion and lyricism, Guy Standing commands the reader to wake up to the threat posed by rentier capitalism's violent policies for extraction, exploitation and depletion of that which is both common to us all but also vital to our survival: the sea and all within it. Ann Pettifor. Shines a bright light on the economy of the oceans, directing us brilliantly towards where a sustainable future lies. Danny Dorling. This is a powerful visionary book, essential reading for all who yearn for a better world. Jason Hickel. The sea provides more than half the oxygen we breathe, food for billions of people and livelihoods for hundreds of millions. But giant corporations are plundering the world's oceans, aided by global finance and complicit states following the neoliberal maxim of Blue Growth. The situation is dire: rampant exploitation and corruption now drive all aspects of the ocean economy, destroying communities, intensifying inequalities and driving fish populations and other ocean life towards extinction. *The Blue Commons* is an urgent call for change from a campaigning economist responsible for some of the most innovative solutions to inequality of recent times. From large nations bullying smaller nations into giving up eco-friendly fishing policies to the profiteering by the Crown Estate in commandeering much of the British seabed, the scale of the global problem is synthesised here for the first time as well as a toolkit for all of us to rise up and tackle it. The oceans have been left out of

calls for a Green New Deal but must be at the centre of the fight against climate change How do we do it By building a Blue Commons alternative a transformative worldview and new set of proposals that prioritise the historic rights of local communities the wellbeing of all people and with it the health of our oceans

The segregated city: A Nordic overview Moa Tunström,Shinan Wang,2019-03-28 Issues related to segregation and integration are major responsibilities and challenges for cities and a segregated urban environment can be understood as a symptom of wider social injustices In this brief overview of current research on residential segregation the focus is on structural reasons to segregation This means that it is planning policies and tendencies in socio economic development that are discussed rather than specific social integration measures and projects But there is an obvious arena where these two approaches to segregation meet and that is in the local community and its spaces for social interaction This is important to keep in mind that the integrated city is both a result of strategies and initiatives on a micro scale in the neighbourhood and between individuals and initiatives and development on a macro scale This report is part of a theme on segregation within the Nordic collaboration programme for effective integration and inclusion of refugees and immigrants in the Nordic countries Read more at www.integrationnorden.org
