Languaging Myths and Realities Qianqian Zhang-Wu, 2021-11-15 Higher education institutions in Anglophone countries often rely on standardized English language proficiency exams to assess the linguistic capabilities of their multilingual international students. However, there is often a mismatch between these scores and the initial experiences of international students in both academic and social contexts. Drawing on a digital ethnography of Chinese international students' first semester languaging practices, this book examines their challenges, needs, and successes on their initial languaging journeys in higher education. It analyzes how they use their rich multilingual and multi-modal communicative repertoires to facilitate languaging across contexts in order to suggest how university support systems might better serve the needs of multilingual international students. *Official Gazette of the United States Patent and Trademark Office*, 2007
