Math Mammoth Grade 7-A Worktext Maria Miller,2025-04-11 Math Mammoth Grade 7 A Worktext is the student book for the first half of 7th grade mathematics studies or the first half of a pre algebra course Math Mammoth grade 7 is a pre algebra curriculum The main areas of study in Math Mammoth Grade 7 A are introduction to basic algebra concepts integers and their operations solving one step equations including with negative numbers operations with negative rational numbers solving linear equations and writing equations for word problems This is the full color version in other words the inside pages are in full color Features Math Mammoth focuses on conceptual understanding It explains the WHY so your children can understand the math not just learn HOW to do it Concepts are often explained with visual models followed by exercises using those models These visual models can take the place of manipulatives for many children however it is very easy to add corresponding manipulatives to the lessons if so desired The curriculum is mastery oriented This means it concentrates fairly long on a topic delving into its various aspects This promotes conceptual understanding as opposed to spiral curricula that often tend to jump from topic to topic too much

It requires very little teacher preparation required The curriculum has no separate teacher s manual nor is it scripted The introduction to each chapter has some notes for the teacher concerning the material in the chapter All the instruction is written directly to the student in the worktext and there also exist accompanying videos where you can see Maria herself teach the material After each chapter introduction you will find a list of Internet links and resources games quizzes animations etc that can be used for fun illustrations and further practice Please note this is the full color version of the worktext

The Well-Trained Mind Susan Wise Bauer,Jessie Wise,2016-08-09 Is your child getting lost in the system becoming bored losing his or her natural eagerness to learn If so it may be time to take charge of your child s education by doing it yourself The Well Trained Mind will instruct you step by step on how to give your

child an academically rigorous comprehensive education from preschool through high school one that will train him or her to read to think to understand to be well rounded and curious about learning Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium which organizes learning around the maturing capacity of the child's mind and comprises three stages the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules the middle school logic stage in which the student begins to think more analytically and the high school rhetoric stage where the student learns to write and speak with force and originality Using this theory as your model you'll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading writing history geography mathematics science foreign languages rhetoric logic art and music regardless of your own aptitude in those subjects Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well Trained Mind* to create a truly superior education for the children in their care This extensively revised fourth edition contains completely updated curricula and book lists links to an entirely new set of online resources new material on teaching children with learning challenges cutting edge math and sciences recommendations answers to common questions about home education and advice on practical matters such as standardized testing working with your local school board designing a high school program preparing transcripts and applying to colleges You do have control over what and how your child learns *The Well Trained Mind* will give you the tools you'll need to teach your child with confidence and success
