Moschkovich, David Wagner, Arindam Bose, Jackeline Rodrigues Mendes, Marcus Schütte, 2018-03-27 This book considers some of the outstanding questions regarding language and communication in the teaching and learning of mathematics an established theme in mathematics education research which is growing in prominence Recent research has demonstrated the wide range of theoretical and methodological resources that can contribute to this area of study including those drawing on cross disciplinary perspectives influenced by among others sociology psychology linguistics and semiotics Examining language in its broadest sense to include all modes of communication including visual and gestural as well as spoken and written modes it features work presented and discussed in the Language and Communication topic study group TSG 31 at the 13th International Congress on Mathematical Education ICME 13 A joint session with participants of the Mathematics Education in a Multilingual and Multicultural Environment topic study group TSG 32 enhanced discussions which are incorporated in elaborations included in this book Discussing cross cutting topics it appeals to readers from a wide range of disciplines such as mathematics education and research methods in education multilingualism applied linguistics and beyond

Internet of Things, Infrastructures and Mobile Applications Michael E. Auer, Thrasyvoulos Tsiatsos, 2020-09-10 This book gathers papers on interactive and collaborative mobile learning environments assessment evaluation and research methods in mobile learning mobile learning models theory and pedagogy open and distance mobile learning life long and informal learning using mobile devices wearables and the Internet of Things game based learning dynamic learning experiences mobile systems and services for opening up education mobile healthcare and training case studies on mobile learning and 5G network infrastructure Today interactive mobile technologies have become the core of many if not all fields of society Not only do the younger generation of students expect a mobile working and learning environment but also the new ideas

technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning IMCL2019 which was held in Thessaloniki Greece from 31 October to 01 November 2019. Since being founded in 2006 the conference has been devoted to new approaches in interactive mobile technologies with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends as well as best practices. The book's intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry etc. Drum, 2006

Proceedings of the ... International Conference for the Psychology of Mathematics Education, 1998 Primary Education in Crisis Brahm Fleisch, 2008. In the past decade the national preoccupation has been on the crisis in secondary schools. Lurking behind the intractable problem of low pass rates, the dysfunctional schools and the small number of higher grade mathematics and science graduates is the calamity in primary education. Drawing on the work of researchers in a range of fields including psychology, sociology, anthropology, linguistics, economics, the health sciences and mathematics education, this book documents the depth and scope of the primary education crisis and provides a comprehensive and rigorous explanation of its causes. Primary education in crisis pulls together the wealth of research on health, poverty, resources, language and teaching as factors in academic achievement in reading, writing and mathematics. At the centre of the book is an analysis of the published studies that systematically document what teachers teach and fail to teach and why it is that teaching is at the heart of the crisis in primary education. The author suggests that there are no quick fixes but only hard choices and that for reform to succeed it must be evidence based. **South African Language Rights Monitor 2011 / Suid-Afrikaanse Taalregtemonitor 2011** Johan Lubbe, Theodorus du Plessis, 2016-01-05. The SALRM 2011 provides a rich source of information on a range of language related subjects. A prominent issue remains the changing of street and place names including the Pretoria Tshwane and Louis Trichardt Makhado sagas. Language in education remains a thorny issue as medium of instruction at school and tertiary level and the proposal that passing an African language should be a requirement in order to obtain a tertiary degree in South Africa. In terms of language legislation the draft version of the National Language Act was proposed. The language of record in courts also received attention in the media. **The Palgrave Handbook of Race and Ethnic Inequalities in Education** P. Stevens, A. Dworkin, 2014-01-22. This comprehensive state of the art reference work provides the first systematic review to date of how sociologists have studied the relationship between race, ethnicity and educational inequality over the last thirty years in eighteen different national contexts.
