prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v Board of Education*, Schenley succumbed to default segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

**The Return of History** Jennifer Welsh, 2016-09-17 In the 2016 CBC Massey Lectures former Special Advisor to the UN Secretary General and international relations specialist Jennifer Welsh delivers a timely intelligent and fascinating analysis of twenty first century geopolitics In 1989 as the Berlin Wall crumbled and the Cold War dissipated the American political commentator Francis Fukuyama wrote a famous essay entitled The End of History which argued that the demise of confrontation between Communism and capitalism and the expansion of Western liberal democracy signalled the endpoint of humanity s sociocultural and political evolution and the path toward a more peaceful world But a quarter of a century after Fukuyama s bold prediction history has returned arbitrary executions attempts to annihilate ethnic and religious minorities the starvation of besieged populations invasion and annexation of territory and the mass movement of refugees and displaced persons It has also witnessed cracks and cleavages within Western liberal democracies as a result of deepening economic inequality The Return of History argues that our own liberal democratic society was not inevitable but that we must all as individual citizens take a more active role in its preservation and growth

Globalization has adversely affected working class organization and mobilization increasing inequality by redistribution upwards from labour to capital. However workers around the world are challenging their increased exploitation by globalizing corporations. In developed countries many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances. In developing countries militant new labour movements are emerging. Drawing upon insights in anti determinist Marxian perspectives Verity Burgmann shows how working class resistance is not futile as protagonists of globalization often claim. She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century. With case studies from around the world including Greece since 2008 she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change. Aging and less agile manifestations of the labour movement decline while new expressions of working class organization and mobilization arise to better battle with corporate globalization. This book will be of interest to students and scholars of labour studies globalization political economy Marxism and sociology of work. 24
