What Went Right Roberta Israeloff, George McDermott, 2017-05-24 In What Went Right Lessons from Both Sides of the Teacher s Desk co authors Roberta Israeloff and George McDermott resume a conversation they began in 1967 when she was in eleventh grade at

Syosset N Y High School and he was her English teacher In 2014 after finding each other on Facebook they began an email correspondence as contemporaries rather than student and teacher and quickly discovered that neither had ever stopped thinking about that school and the many ways it influenced them As they shared their impressions of how and why public education has changed since then they realized that a single academic year can have a deeper and longer lasting impact than they had ever imagined Personal and probing evocative and wide ranging the letters that compose this book ask and attempt to answer some timeless and timely questions What makes a teacher or a class memorable How can the teacher student relationship be supported and strengthened What does being educated truly mean And perhaps most important what role can free public education play in sustaining our democracy Performance Costume Sofia Pantouvaki, Peter McNeil, 2020-12-10 Costume is an active agent for performance making it is a material object that embodies ideas shaped through collaborative creative work A new focus in recent years on research in the area of costume has connected this practice in vital and new ways with theories of the body and embodiment design practices artistic and other forms of collaboration Costume like fashion and dress is now viewed as an area of dynamic social significance and not simply as passive reflector of a pre conceived social state or practice This book offers new approaches to the study of costume as well as fresh insights into the better understood frames of historical theoretical practice based and archival research into costume for performance This anthology draws on the experience of a global group of established researchers as well as emerging voices Below is a list of just some of the things it achieves 1 Introduces diverse perspectives innovative new research methods and approaches for researching design and the costumed body in performance 2 Contributes towards a new understanding of how costume actually performs in time and space 3 Offers new insights into existing practices as well as creating a space of connection between practitioners and researchers from design the humanities and social sciences Early Warning Systems and Targeted Interventions for Student Success in Online Courses Glick, Danny, Cohen, Anat, Chang, Chi, 2020-06-26 Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face to face teaching such as overcrowded classrooms and shortage of certified teachers While online learning has been recognized as a possible approach to deliver more desirable learning outcomes close to half of online students drop out as a result of student related course related and out of school related factors e g poor self regulation ineffective teacher student student student and platform student interactions low household income Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason A well implemented early warning system therefore can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation Despite the popularity of early warning systems research on their design and implementation is sparse Early Warning Systems and Targeted Interventions for Student Success in Online Courses is a cutting edge research publication that examines current theoretical frameworks research projects and empirical studies related to the design

implementation and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice Moreover this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and therefore more actionable Highlighting a range of topics such as curriculum design game based learning and learning support it is ideal for academicians policymakers administrators researchers education professionals instructional designers data analysts and students

Synergistic Effects of Climate Change and Air Pollution on Health Zhaobin Sun, Shupeng Zhu, Xingqin An, 2025-05-14 Humans are exposed to both meteorological conditions and different types of atmospheric aerosols all the time However there are still large uncertainties about the impact of air pollution and meteorological factors on human health and more new evidence is needed to support scientific emission reduction and government decision making Previous studies have focused more on the health effects of one type of atmospheric environment But evidence for the health effects of multiple exposures to extreme environments is scarce In this Research Topic we aim to present a collection of original articles and reviews that address the impact of the atmospheric environment and climate change on public health We would encourage new findings and case studies that provide insights into connections between health risks and impacted by air pollution and climate change We also welcome research on the synergistic effects of air pollution and meteorological factors on health
