educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

The International Journal of Indian Psychology, Volume 2, Issue 1, No. 3 IJIP.In,2014-11-25 The International Journal of Indian Psychology ISSN 2348 5396 is an academic journal that examines the intersection of psychology home sciences and education IJIP is published quarterly and is available in electronic versions Our expedited review process allows for a thorough analysis by expert peer reviewers within a time line that is much more favorable than many other academic publications Last Bell Carl Bistany,Stephanie Gruner Buckley,2015-11-05 In the mid nineties the Alfred Glickman School was just another failing school in one of America s most violent cities Then SABIS a private for profit education provider took over Twenty years later the school is a six time silver medalist in U S News World Report s annual America s Best High Schools listing and every single graduate of the school has been offered a college place With success of this magnitude you would think that for profit managed charter schools like SABIS would be in high demand On the contrary they are fought at every turn Why is the idea of employing for profit companies to help rescue failing public schools treated with fear and hostility Stranger still why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake Last Bell is a book about politics money and power It examines the charge that for profits running charter schools are in it for the money not the kids and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools Last Bell is a reasonable voice in a polarized debate It does not call for an end to public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future

The Education Invasion Joy Pullmann,2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in

curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation s schools Who benefits And how can citizens regain local self governance in education so their children s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies

The Qualified Student Harold S. Wechsler, 2017-09-29 In The Qualified Student Harold S Wechsler focuses on methods of student selection used by institutions of higher education in the United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The

volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions The SAGE Guide to Educational Leadership and Management Fenwick W. Psychology and Mathematics Education Gila Hanna,Laura Macchi,Karin Binder,Laura Martignon,Katharina Loibl,2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity

Evaluation in Foreign Language Education in the Middle East and North Africa Sahbi Hidri,Christine Coombe,2016-09-27 This book presents evaluation cases from the Middle East and North Africa MENA context investigating the various facets of evaluation in different parts of the MENA region and beyond In 19 chapters it explores cases from Tunisia Saudi Arabia Egypt Sudan Syria the UAE Turkey Iran and Morocco The book highlights the impact of evaluation on a range of stakeholders arguing that it has repercussions at the individual societal economic cultural and political levels that it also has an ethical dimension and that it is tailored to people s needs helping them to remain abreast of the effectiveness and efficiency of programs Further the book explores controversial issues concerning different evaluation themes such as teacher

and staff evaluation assessment practices text genre analysis evaluation assessment of productive skills textbook and ICT evaluation evaluation of ELT certificates and programs quality assurance ESP needs analysis assessment literacy and dynamic assessment It addresses key challenges such as who the right people to implement evaluation are and the appropriate use of evaluation results to avoid any misuse or harm to any stakeholder In closing the book calls for further research venues on the relevance of evaluation testing and assessment in the MENA context and beyond The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people PISA 2015 Assessment and Analytical Framework Science, Reading, Mathematic and Financial Literacy OECD, 2016-04-19 What is important for citizens to know and be able to do The OECD Programme for International Student Assessment PISA seeks to answer that question through the most comprehensive and rigorous international assessment of student knowledge and skills **PISA 2015 Assessment and Analytical Framework Science, Reading, Mathematic, Financial Literacy and Collaborative Problem Solving** OECD, 2017-08-31 What is important for citizens to know and be able to do The OECD Programme for International Student Assessment PISA seeks to answer that question through the most comprehensive and rigorous international assessment of student knowledge and skills **Over-Tested and Under-Prepared** Bob Sornson, 2022-11-23 Pressured by standardized testing and rigid pacing guidelines many schools are forced to cover too much content too quickly without being able to meet the needs of individual students In this powerful book from acclaimed author and presenter Bob Sornson you ll learn how shifting from curriculum

based instruction to competency based personalized learning can help students become more successful confident and engaged learners Each chapter is easy to digest and provides compelling research strategies and anecdotes to inspire conversation and action This second edition provides updated statistics and examples of schools successfully using competency based learning models to help you bring about meaningful change Teachers administrators and community leaders will all find practical resources and a clear rationale for transforming our current educational system into a new dynamic model of teaching and learning **Big Theories Revisited 2** Gregory Arief D.
