Integrating Young Adult Literature through the Common Core Standards Rachel L. Wadham, Jon W. Ostenson, 2013-01-07 This book advocates for a stronger role for young adult literature in ELA classrooms compellingly documenting how this body of work meets both the needs of adolescent students and the demands of the common core for complex texts and tasks Integrating Young Adult Literature through the Common Core Standards provides a compelling template for teachers that uses young

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions

Structured Literacy Jacquelyn Chovanes, Emily Sharp, 2025-03-04 This book follows the explicit instructional sequence noted by educational researchers as the most effective means of teaching students new skills and content It begins by offering a rationale for why students should be interested in learning about structured literacy and how they can use it in their teaching practice It provides background knowledge needed to contextualize the book s content Then it takes learners step by step through the process of assessing students and creating effective structured literacy instructional routines

Detailed information about how to implement structured literacy instruction and intervention at all three tiers is provided. This textbook will be a unique and valuable addition to the extant literature because thus far no book has approached the topic in this way. There are books about structured literacy that include examples of learning activities (Spear-Swerling et al., 2021), but there is no single comprehensive textbook that can be readily picked up and used by college instructors and their students. This book is not a compendium of the research nor is it a program with scripted lessons. It is a comprehensive textbook that uniquely provides the background information on structured literacy and the methods and related content needed to successfully prepare preservice teachers to assess, plan, and implement structured literacy instruction and intervention. The book is designed to be used in the context of a college-level one or two semester undergraduate or graduate literacy course. Currently, no similar textbook exists. This book defines structured literacy, describes the history of reading research and the science of reading. Then the book provides explicit information about how students learn to read and the most effective methods and strategies teachers can use to teach reading to all students. Next, the book provides detailed and specific instruction in specific structured literacy practices to use at Tiers 1 and 2. Intensive assessment, diagnostic, and instructional strategies for learners who require individualized Tier 3 intervention are thoroughly explained. Many detailed examples of specific instructional routines and corrective procedures are included, along with reproducibles that support lesson planning, implementation, and assessment. At the end of each chapter, discussion questions and suggestions for hands-on learning activities are provided. Preparing pre-service teachers in the whys and hows of structured literacy instruction and intervention allows them to teach reading effectively according to current understanding of the science of reading. Teachers prepared with this knowledge base will be able to use the resources in this book to create additional materials and adapt materials from any literacy program to individualize instruction according to the needs of their students. This book will be a valuable addition to any college-level general or special education reading methods course. The instructional routines taught in the book are designed to be accessible to students with and without disabilities. Effective reading instruction, such as the kind described in this book, increases educational equity for students of color and English learners. Suggestions for differentiating instruction based upon individual student needs are provided.
