Grade Life Science Midyear Exam 2014:

Moving Beyond Grades to Purposeful Learning David Wei Loong Hung, 2023-09-14 This book explores future directions in Singaporean education as it moves beyond its historically formative goals of survival efficiency and performance and its emphasis on grades and formal credentialing. It examines the future of education via the 4Life framework, a four form model for purposeful learning centered around social emotional regulation and the well being of the individual learner. Life long learning the learning that occurs over a learner's lifespan. Life deep learning a deep understanding of learned content and adaptive expertise. Life wide learning learning in multiple contexts besides the school environment and Life wise learning learning which focuses on the learner's values, morals, character and historical empathy. This book also illustrates how purposeful learning serves to equip learners with the knowledge, skills, dispositions and competencies they need to thrive as adaptive workers in the economy of the future.
