Competence Assessment in Education Detlev Leutner, Jens Fleischer, Juliane Grünkorn, Eckhard Klieme, 2017-03-27 This book addresses challenges in the theoretically and empirically adequate assessment of competencies in educational settings. It presents the scientific projects of the priority program Competence Models for Assessing Individual Learning Outcomes and Evaluating Educational Processes which focused on competence assessment across disciplines in Germany. The six year program coordinated 30 research projects involving experts from the fields of psychology, educational science and subject specific didactics. The main reference point for all projects is the concept of competencies which are defined as context specific cognitive dispositions that are acquired and needed to successfully cope with certain situations or tasks in specific domains. Koeppen et al 2008 p 62. The projects investigate different aspects of competence assessment. The primary focus lies on the development of cognitive models of competencies complemented by the construction of psychometric models based on these theoretical models. In turn the psychometric models constitute the basis for the construction of instruments for effectively measuring competencies. The assessment of competencies plays a key role in optimizing educational processes and improving the effectiveness of educational systems. This book contributes to this challenging endeavor by meeting the need for more integrative interdisciplinary research on the structure levels and development of competencies. **The Principal's Handbook** Cynthia Mathews B.S. M.S. C.A.S., 2020-08-19 The Principal's Handbook is ungraded. All of the routines, practices and policies suggested can be used in all school settings. Specific information can be initiated to serve the grade level of the school environment. This handbook was prepared for the principal to use as a guide to bringing to all personnel in the school a ready reference in regard to current instructional practices and existing routines which will form a part of the policy of the school. All of the documents are meant to be examples which could easily be transformed to meet the needs of any building administrator. This model handbook is a resource to be used by the principal to create a similar booklet reflecting the principal's personal leadership style. The material in this handbook is the nitty gritty of the routines and policies which are needed to assure a good start AND MAINTAIN A PRODUCTIVE ACADEMIC YEAR. *Guided Math Lessons in First Grade* Nicki Newton, 2021-07-15 Guided Math Lessons in First Grade provides detailed lessons to help you bring guided math groups to life.
