Cheryl R. Ellerbrock, Katherine M. Main, David C. Virtue, 2022-09-02. This volume offers a cross-national analysis of teacher education programs designed to prepare teachers for work in middle-level schools. The book showcases 15 detailed case studies of courses at institutions across North America, Europe, Asia, and Africa, including from countries currently underrepresented in middle-level literature, which provide detailed information on programming whilst foregrounding the political, social, and cultural factors which have influenced priorities within teacher education. Underpinning the book is a comparative case study framework used to identify divergences and commonalities within and across nations whereby factors such as globalization, policy, and socio-cultural views of teaching and adolescence are explored as determinants of the nature, success, and challenges of middle-level teacher preparation. This text will benefit scholars, academics, and students in the fields of middle-level education, teacher education, and international and comparative education. Those involved with educational policy and politics, as well as teacher training and the sociology of education more broadly, will also benefit from this volume.

in Education, 1984. **Reimagining Nigeria's Educational System** Joseph A. Balogun, 2023-09-20. This book assesses the challenges within the Nigerian educational system and provides a concrete plan to revitalize the low-performing system by strengthening high-stakes testing at all levels. In Nigeria, many citizens believe that the solution to the country's low performance in education is to eliminate high-stakes standardized testing. High-stakes testing refers to applying standardized

student achievement tests as a primary mechanism to evaluate students teachers and their school s performance This book argues that the poor quality of education and low ranking of Nigeria s educational system is not related to the negative consequences of high stakes testing but rather is due to many intrinsic factors By conducting a comparative analysis of six high performing education systems worldwide the book offers a comparative summative evaluation of the educational system and offers recommendations This book will be of interest to policymakers and scholars in the fields of African education higher education quality and global studies African studies management and administration leadership and professional development studies Joseph Abiodun Balogun is former Dean and retired Distinguished University Professor at the College of Health Sciences Chicago State University USA Visiting Professor Program Consultant at the Centre of Excellence in Reproductive Health Innovation University of Benin Nigeria and President CEO Joseph Rehabilitation Center Tinley Park Illinois USA

Neuroinflammation and Behaviour Luba Sominsky,Adam K. Walker,Deborah M. Hodgson,2015-07-21 The brain and immune system are involved in an intricate network of bidirectional communication This relationship is vital for optimal physiological and psychological development and functioning but can also result in unwanted outcomes In particular this interaction plays an important role in cognition mood and behaviour Neuroinflammation is known to contribute to neurological and affective disorders including impaired learning and memory depressive anxiety and schizoaffective symptoms as well as pain The development of these conditions often occurs on the backdrop of pre existing physical illnesses which give rise to increased activation of the immune system such as cancer obesity infection and autoimmune disorders Similarly psychological states can alter regulation of the immune system This has been most extensively studied in the context of stress and immune function Understanding the underlying mechanisms that lead to the onset of inflammation induced neuropathology and stress induced immune suppression will contribute to the development of novel and effective treatment strategies for both the disease and its neurological side effects In this research topic we explored the relationship between the immune system and the brain throughout life We include both original research and review papers from animal clinical and molecular perspectives

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek,Joachim Funke,Magda Osman,Annette Kluge,2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type

of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained *New Statesman* ,1962 **Author Index to Psychological Index ... and Psychological Abstracts ...** ,1960
