Logic in Grammar Gennaro Chierchia, 2013-07-25 In a fundamental investigation of language and human reasoning Gennaro Chierchia looks at how syntactic and inferential processes interact through the study of polarity sensitive and free choice items He reformulates the semantics of focus and scope and the pragmatics of implicature as part of the recursive semantic system
The Moral Economy of Activation Magnus Paulsen Hansen, 2019-09-11 Activation policies which promote and enforce labour market participation continue to proliferate in Europe and constitute the reform blueprint from centre left to centre right as well as for most international organizations Through an in depth study of four major reforms in Denmark and France this book maps how co existing ideas are mobilised to justify criticise and reach activation compromises and how their morality sediments into the instruments governing the unemployed By rethinking the role of ideas and morality in policy changes this book illustrates how the moral economy of activation leads to a permanent behaviourist testing of the unemployed in public debate as well as in local jobcentres
Foundations of Musical Grammar Lawrence Michael Zbikowski, 2017 How is it that humans are able to organize seemingly random sounds into the captivating sonic structures we call music In this volume Lawrence M Zbikowski argues that humans unique ability to correlate sounds with dynamic processes provides the basis for the construction of meaningful musical utterances that is a foundation for musical grammar Building on a framework for grammar developed by cognitive linguists over the past three decades and the pathbreaking

research set out in his earlier book *Conceptualizing Music* OUP 2002 Zbikowski explains how the ability to draw analogies between widely differing domains allowing humans to connect sequences of musical sounds with emotion processes physical gestures and the steps of dance He shows how these connections underpin an evocative movement from a cantata by J S Bach guide our understanding of gestural choreographies by Fred Astaire and Charlie Chaplin and frame connections between movement and music in French courtly dance and the Viennese waltz Through thorough surveys of research in cognitive science and careful analyses of works by composers ranging from Bach Brahms and Schubert to Jerome Kern Zbikowski explores the unique resources for communication offered by music and examines how these differ from those of language *Foundations of Musical Grammar* is sure to be an instant and enticingly controversial classic within the evolving literature addressing the many complex intersections of music and language from dust jacket

The Equilibrium of Human Syntax Andrea Moro, 2013-09-13 This book assembles a collection of papers in two different domains formal syntax and neurolinguistics Here Moro provides evidence that the two fields are becoming more and more interconnected and that the new fascinating empirical questions and results in the latter field cannot be obtained without the theoretical base provided by the former The book is organized in two parts Part 1 focuses on theoretical and empirical issues in a comparative perspective including the nature of syntactic movement the theory of locality and a far reaching and influential theory of copular sentences Part 2 provides the original sources of some innovative and pioneering experiments based on neuroimaging techniques focusing on the biological nature of recursion and the interpretation of negative sentences Moro concludes with an assessment of the impact of these perspectives on the theory of the evolution of language The leading and pervasive idea unifying all the arguments developed here is the role of symmetry breaking in syntax and in the relationship between language and the human brain

Recent Developments in Functional Discourse Grammar Evelien Keizer, Hella Olbertz, 2018-11-15 This volume presents a collection of papers using the theory of Functional Discourse Grammar FDG to analyse and explain a number of specific constructions or phenomena external possessor constructions and binominal constructions negation modification modality polysynthesis and transparency from different perspectives language specific comparative and typological In addition to applying the theory to the topics in question these papers aim to contribute to the further development of the theory by modifying and extending it on the basis of new linguistic evidence from a range of languages thus providing the latest state of the art in FDG The volume as a whole however does more than this as separately and together the papers collected here aim to demonstrate how FDG with its unique architecture can provide new insights into a number of issues and phenomena that are currently of interest to theoretical linguists in general

Acquisition Katherine Messenger,2022-09-15 Syntactic priming is a naturally occurring psycholinguistic phenomenon that has been used as an experimental manipulation to great effect over the last 20 years syntactic priming research with children of different backgrounds has added to our understanding of the mechanisms and stages of syntactic development and priming This collection of original articles explores the state of the art in that literature Ten chapters review the findings of syntactic priming research with monolingual and multilingual typically developing and atypically developing child populations from a variety of language backgrounds The expert authors explore what syntactic priming has revealed about children s development of syntax and propose ways in which methodological innovations and broadening the scope of future research can build on this The collection will be a useful resource for researchers from diverse areas of the field of child language particularly those with a focus on grammatical development [The Cambridge Handbook of Third Language Acquisition](#) Jennifer Cabrelli,Adel Chaouch-Orozco,Jorge González Alonso,Sergio Miguel Pereira Soares,Eloi

Puig-Mayenco, Jason Rothman, 2023-07-27 In our increasingly multilingual modern world understanding how languages beyond the first are acquired and processed at a brain level is essential to design evidence based teaching clinical interventions and language policy Written by a team of world leading experts in a wide range of disciplines within cognitive science this Handbook provides a comprehensive overview of the study of third and more language acquisition and processing It features 30 approachable chapters covering topics such as multilingual language acquisition education language maintenance and language loss multilingual code switching ageing in the multilingual brain and many more Each chapter provides an accessible overview of the state of the art in its topic while offering comprehensive access to the specialized literature through carefully curated citations It also serves as a methodological resource for researchers in the field offering chapters on methods such as case studies corpora artificial language systems or statistical modelling of multilingual data [\[Download PDF\] \[Download PDF\] \[Download PDF\] \(2022-23 UPTET/CTET\) YCT Expert Team , 2022 23 UPTET CTET English Pedagogy Previous Solved Papers *Literature and Fascination* Sibylle Baumbach, 2015-07-30 Exploring literary fascination as a key concept of aesthetic attraction this book illuminates the ways in which literary texts are designed presented and received Detailed case studies include texts by William Shakespeare S T Coleridge Mary Shelley Bram Stoker Oscar Wilde Joseph Conrad Don DeLillo and Ian McEwan *The Acquisition of Direct Object Scrambling and Clitic Placement* Jeannette C. Schaeffer, 2000-01-01 This book offers a new contribution to the debate concerning the real time acquisition of grammar in First Language Acquisition Theory It combines detailed and quantitative observations of object placement in Dutch and Italian child language with an analysis that makes use of the Modularity Hypothesis Real time development is explained by the interaction between two different modules of language namely syntax and pragmatics Children need to build up knowledge of how the world works which includes learning that in communicating with someone else one must realize that speaker and hearer knowledge are always independent Since the syntactic feature referentiality can only be marked if this pragmatic distinction is made and assuming that certain types of object placement such as scrambling and clitic placement are motivated by referentiality it follows that the relevant syntactic mechanism is dependent on the prior acquisition of a pragmatic distinction \[The Metaphorical Brain 2\]\(#\) Michael A. Arbib, 1989-08-14 This was begun as a revision of the 1972 classic *The Metaphorical Brain* but quickly grew into an independent work This new volume offers readers a timely in depth exploration of exciting research into the interplay between brain modeling computer design and artificial intelligence](#)

What's the Story Anne Bogart, 2014-04-16 Anne Bogart is an award winning theatre maker and a best selling writer of books about theatre art and cultural politics In this her latest collection of essays she explores the story telling impulse and asks how she as a product of postmodernism can reconnect to the primal act of making meaning and telling stories She also asks how theatre practitioners can think of themselves not as staggers of plays but orchestrators of social interactions and participants in an on going dialogue about the future We dream And then occasionally we attempt to share our dreams with

others In recounting our dreams we try to construct a narrative We also make stories out of our daytime existence The human brain is a narrative creating machine that takes whatever happens and imposes chronology meaning cause and effect We choose We can choose to relate to our circumstances with bitterness or with openness The stories that we tell determine nothing less than personal destiny From the introduction This compelling new book is characteristically made up of chapters with one word titles Spaciousness Narrative Heat Limits Error Politics Arrest Empathy Opposition Collaboration and Sustenance In addition to dipping into neuroscience performance theory and sociology Bogart also recounts vivid stories from her own life But as neuroscience indicates the event of remembering what happened is in fact the creation of something new
