1 HARDWARE SETUP

Turn on the G-CONNECT by pressing the Power Button. The Status and POWERD status indicator light will blink. The Status light will continue to flash for a few moments indicating that your device is powering on.

3 SETUP YOUR DEVICE

- 1 **Wireless Network (SSID) Name**
Just like connecting to the Internet through a wireless home router, the Wireless Network (SSID) name is used to identify your G-CONNECT. The name is used to connect to the device. You can leave this as the default name "G-CONNECT" but it is recommended that you enter a name that is more meaningful to you.
- 2 **Admin Account**
The Admin account is used as both the password to the Wireless Network and the password to the device. This account is used to access the device. It is recommended that you enter a name that is more meaningful to you.

Finishing the setup

Once you've entered your information, click on the "Submit" button to complete setup. You can now begin using G-CONNECT by entering <http://www.g-technology.com> into your preferred web browser and logging in using either the Guest or Admin account credentials.

2 CONNECT TO THE WIRELESS NETWORK

Go to the Wireless Network Connection icon on your personal computer and view your available Wireless Networks. Find the network named "G-CONNECT" and connect to it.

Now, when you disconnect, after the next G-CONNECT use the top bar right of your device's screen to disconnect, which will be a red button labeled "Disconnect" in the status bar.

Once you are connected to the G-CONNECT device's wireless network, open a new browser window and type in <http://www.g-technology.com> to go to the G-CONNECT Web site page. Click on the link that says "Click Here to Login" to visit other setup pages.

CONNECTING TO THE INTERNET

You can also use your G-CONNECT device as a Wi-Fi hotspot to connect to the Internet. Just plug an Ethernet cable from your home router into the G-CONNECT device and open a browser to begin surfing the web.

4 WELCOME TO G-CONNECT

- A Available Capacity
- B Display and manage content by folder
- C Display content by type
- D Sort content by date created
- E Show Thumbnail or List view
- F Perform operations on selected items (Play/View/Share/Delete/Download/Download)

Now that the G-CONNECT has been successfully setup, you can add content in a variety of ways. The recommended way to add content to the device is by using the included USB 3.0 Cable. For alternate ways to add content, visit <http://www.g-technology.com/support>

Transferring files using the USB 3.0 Cable

Power off the G-CONNECT by pressing the power button found on the device until the LED's begin flashing. When the LED's turn off, it is safe to disconnect the power adapter and using the USB 3.0 Cable provided to you with the box contents. Plug the two identical ends of the 3.0 Cable into your personal computer and the device into your G-CONNECT.

Your G-CONNECT should now appear as a drive on the desktop if using a Mac and in "My Computer" if using Windows.

Open Finder on your Mac or Windows Explorer on PC and find the G-CONNECT icon. Drag and drop files from your personal computer into the default folder type on the G-CONNECT. It is recommended, but not required that you use either the Admin or Public folder.

Files added into the top level folder are private and only visible to users who log in using the Admin account. Files added under the Public folder are accessible by all users that log into the G-CONNECT using the Guest permission.

Once you have added your content to the device, you can safely remove the G-CONNECT from your Personal Computer and reconnect it to the power supply for Wi-Fi usage.
