9. Blocks, P , Q and R , connected by light inextensible threads, are placed on a smooth horizontal surface as shown. A constant force F is applied to P so that the whole system travels to the right with acceleration.

A lump of plasticine is placed on Q and it moves together with Q . If the applied force F remains unchanged, how would the tensions T_1 and T_2 in the two threads change?

	Tension T_1	Tension T_2
A.	increase	decrease
B.	increase	increase
C.	decrease	decrease
D.	decrease	increase

Diagram of block P with tension T_1 to the left and force F to the right.

$$F - T_1 = \frac{F}{3}$$

$$T_1 = \frac{2}{3} F$$

Physics Exam-builder for HKDSE Y. M. Yeung, 2012-05-01 Book 3 is written for the compulsory part Wave Motion It is a useful supplement to textbook The questions appear in the order of the syllabus for easy reference All questions are carefully selected to cover various question types requiring different levels of skills Solutions to calculations and explanations of different options in most multiple choice questions and full marking schemes for conventional questions are provided to help students consolidate their concepts and master their skills in answering examination type questions *Physics Exam-builder for HKDSE* Y. M. Yeung, 2011-11-01

Physics Exam builder for HKDSE series written by Mr Y M Yeung was launched at November 2011 The first installment of Physics Exam builder for HKDSE series written by Mr Y M Yeung is about the topic Heat and Gases All examination practice questions are carefully selected to cover various question types requiring different levels of skills Full solutions to most multiple choice questions and marking schemes for conventional questions are provided to help students consolidate their concepts and master their skills in answering examination type questions Chapter reviews are included to highlight the important knowledge and principles of physics of each topic **Studies in Science Education**

in the Asia-Pacific Region May May Hung Cheng, Alister Jones, Cathy Buntting, 2017-09-13 Consistent with international trends there is an active pursuit of more engaging science education in the Asia Pacific region The aim of this book is to bring together some examples of research being undertaken at a range of levels from studies of curriculum and assessment tools to classroom case studies and investigations into models of teacher professional learning and development While neither a comprehensive nor definitive representation of the work that is being carried out in the region the contributions from China Hong Kong Taiwan Korea Japan Singapore Australia and New Zealand give a taste of some of the issues being explored and the hopes that researchers have of positively influencing the types of science education experienced by school students The purpose of this book is therefore to share contextual information related to science education in the Asia Pacific region as well as offering insights for conducting studies in this region and outlining possible questions for further investigation In addition we anticipate that the specific resources and strategies introduced in this book will provide a useful reference for curriculum developers and science educators when they design school science curricula and science both pre service and in service teacher education programmes The first section of the book examines features of science learners and learning and includes studies investigating the processes associated with science conceptual learning scientific inquiry model construction and students attitudes towards science The second section focuses on teachers and teaching It discusses some more innovative teaching approaches adopted in the region including the use of group work inquiry based instruction developing scientific literacy and the use of questions and analogies The third section reports on initiatives related to assessments and curriculum reform including initiatives associated with school based assessment formative assessment strategies and teacher support accompanying curriculum reform **The World of Science Education** , 2010-01-01 Each

volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in an Asian rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next Effective Exam Practice for the HKDSE in Physics
