 Over 2 800 total pages INTRODUCTION Today s operational environment presents threats the Army has not faced in nearly
 20 years Against peer competitors the joint force may face air parity or even localized enemy air overmatch challenging the
 assumption of air superiority the joint force has held since the Korean War This will make maneuver forces vulnerable to air
 attack by fixed and rotary wing aircraft unmanned aircraft systems and cruise missiles Maneuver forces lack capacity and
 capability to address these threats and the Army requires a speedy response Stinger missiles provide a key capability for
 maneuver forces to defend themselves from aerial observation and attack However without direct involvement from senior
 brigade combat team leaders and effective leader training these missiles will become dead weight at best or a fratricide in
 waiting at worst Units must plan effectively to utilize this capability and ensure it ties directly to their scheme of maneuver as
 opposed to simply task organizing one Stinger team per company Just a SAMPLE of the CONTENTS CALL HANDBOOK NO

 Information Exchange,1992 *Applying a Multi-skilled Soldier (MSS) Concept to the Stryker Brigade Combat Team (SBCT)*
 John T. Nelsen,2003 The general purpose of this study was to deepen and broaden thinking about the nature and implications
 of possible Multi Skilled Soldier MSS Concept implementation Specific objectives were 1 to determine applicability of the
 MSS to the Stryker Brigade Combat Team SBCT as it might be implemented in Initial Entry Training IET and 2 to prototype
 MSS Concept implementation for the SBCT considering possible implementation for the Future Force The report also defines
 the MSS shows how the MSS Concept might fit conceptually within a larger Army training education and professional
 development model for Soldiers of all ranks offers an MSS Program design for IET and crafts actionable recommendations
 regarding general MSS implementation for IET The study concludes that the MSS Concept is fully applicable to the SBCT as
 well as the so called Current Force It also concludes that MSS implementation would have a significant salutary effect on
 unit training readiness postures across the force This study relied heavily on insights and analysis gained from interviews
 with groups of senior NCOs and officers within the 3rd Brigade SBCT 2nd Infantry Division Ft Lewis WA during September
