Plato and the Nerd Edward Ashford Lee, 2018-10-09 How humans and technology evolve together in a creative partnership In this book Edward Ashford Lee makes a bold claim that the creators of digital technology have an unsurpassed medium for creativity Technology has advanced to the point where progress seems limited not by physical constraints but the human imagination Writing for both literate technologists and numerate humanists Lee makes a case for

engineering creating technology as a deeply intellectual and fundamentally creative process Explaining why digital technology has been so transformative and so liberating Lee argues that the real power of technology stems from its partnership with humans Lee explores the ways that engineers use models and abstraction to build inventive artificial worlds and to give us things that we never dreamed of for example the ability to carry in our pockets everything humans have ever published But he also attempts to counter the runaway enthusiasm of some technology boosters who claim everything in the physical world is a computation that even such complex phenomena as human cognition are software operating on digital data Lee argues that the evidence for this is weak and the likelihood that nature has limited itself to processes that conform to today's notion of digital computation is remote Lee goes on to argue that artificial intelligence's goal of reproducing human cognitive functions in computers vastly underestimates the potential of computers In his view technology is coevolving with humans It augments our cognitive and physical capabilities while we nurture develop and propagate the technology itself Complementarity is more likely than competition [Profil](#) ,2010-07 **Canadian Business** ,1999
