**The Self-Destructive Habits of Good Companies** Jagdish N. Sheth, 2007-04-26 Why do so many good companies engage in self destructive behavior This book identifies seven dangerous habits even well run companies fall victim to and helps you diagnose and break these habits before they destroy you Through case studies from some of yesterday's most widely praised corporate icons you'll learn how companies slip into addiction and slide off the rails why some never turn around and how others achieve powerful turnarounds moving on to unprecedented levels of success You'll learn how an obsession with volume leads inexorably to rising costs and falling margins how companies fall victim to denial myth ritual and orthodoxy how they start wasting vital energy on culture conflict and turf wars how they blind themselves to emerging competition how they become arrogant complacent and far too dependent on their traditional competences Most important you'll find specific detailed techniques for curing or better yet preventing every one of these self destructive habits The cocoon of denial Find it admit it assess it and escape it The stigma of arrogance Escape this fault that breeds in a dark closed room The virus of complacency Six warning signs and five solutions The curse of incumbency Stop your core competencies from blinding you to new opportunities The threat of myopia Widen your view of your competitors and the dangers they pose The obsession of volume Get beyond rising volumes and shrinking margins The territorial impulse Break down the silos factions fiefdoms and ivory towers

**The Asian Miracle, Myth, and Mirage** Bernard Arogyaswamy, 1998-04-23 Until recently double digit economic growth was not unusual among Asian countries and in fact had come to be expected of them From western India to northeastern China markets were booming and incredible numbers of foreign investors were racing into the Asian markets Scholars have written laudatory books and articles politicians want to ensure that trade with Asian countries continues on a rising trajectory and business leaders have become the new promoters of Asian prosperity This book attempts to inject a note of caution and reality while giving Asian countries well deserved credit for improving their economic status Technological managerial and institutional deficiencies need to be addressed in Asian countries if the progress of the past two decades is to be restored and preserved Although Asian nations particularly Japan have invested heavily in R D their success mainly derives from process improvements and not from new product innovations Technology and science are the foundations of modern economic civilization and Asia's assets fall behind Western countries in both areas The centrality of

family based organizations in some Asian economies and the dependence on horizontal vertical networks in others also limits the ability of Asian firms to become global operations The lack of adequate institutions such as an independent judiciary and a responsive polity and the absence of organizations to bridge the gap between familism and the government results in an uncertain societal framework in much of Asia If robust economic growth is to return Asian economies must rectify the weaknesses Arogyaswamy exposes in this provocative and timely book *U.S. Trade Relations with Japan* United States. Congress. Senate. Committee on Foreign Relations,1982 *The Innovation Tools Handbook, Volume 2* H. James Harrington, Frank Voehl, 2016-08-19 In today's fast moving high technology environment the focus on quality has given way to a focus on innovation From presidents of the United States to presidents of Fortune 500 companies it is clear that everyone thinks innovation is extremely important The challenge is that few people stop to define why innovation is important to understand what's driving the need for more innovation We all agree that more frequent innovation is important even necessary There is actually a growing body of evidence that indicates that looking outside of your company rather than purely looking internally and to customers needs using the tools in this Handbook will lead to more innovative ideas Responding to customers needs is the key to a successful business You can use these tools to talk to customers satisfied ones unsatisfied ones potential customers people who would never buy your product or service and also people you have never considered as a potential customer In addition these tools will help you ask your competitors customers about what makes them happy with the current businesses and offerings in the industry why they buy or do not buy from you your competitors and other industries These tools will help you understand the steps in the customer journey they need to take what delights and frustrates them and what their pain points are The three volumes of The Innovation Tools Handbook cover 76 top rated tools and methods from the hundreds available that every innovator must master to be successful Covering evolutionary and or improvement innovative tools and methodologies Volume 2 presents 23 tools methodologies related to innovative evolutionary products processes and services or the improvement of existing ones For each tool the book provides a definition identifies the user of the tool explains what phases of the innovation process the tool is used describes how the tool is used supplies examples of the outputs from the tool identifies software that can maximize its effectiveness and includes references and suggestions for further reading Ideation is about developing ideas on how to seize identified opportunities What are the possible answers to your breakthrough questions Having a deep understanding about the customer their needs and pain points as well as the existing solutions i.e. business models in the industry will naturally lead to new ideas How seriously you do your discovery homework using the tools in these Handbooks will determine not only how fast you create ideas but about how likely these ideas are to succeed Tools and methodologies covered include 5 why questions Affinity diagrams attribute listing brainwriting 6 3 5 cause and effect diagrams creative problem solving model design for tools flowcharting force field analysis Kano analysis nominal group technique plan do check act reengineering redesign reverse
