It is probably due to high demand of female models in Hollywood as compared to male category of models. However it slightly differs in case of acting and modeling. In modeling, this is most important that a leading female model should be in the package. It is for image management.

The demand of leading and successful female models is high whereas the male models are lesser in number but the ones who are in the fields; no doubt they are leading and money takers. But the overall budget and per cast rate is found higher in female models category.

The revenue and success rate of the advertisements in which women models have performed is high and are having decidedly cited records. People have favorites in commercials where they find a female model performing for some brand. The influencing rate is more. It is recognized that the brands which are endorsed by leading female models get raise earlier even the standard is not that much extraordinary.

Another very important factor in high cost female models is that they have to spend more money on their personal maintenance. They are required to wear expensive clothes, jewelry and other accessories in order to retain their persona. The Economic Naturalist's Field Guide Robert H. Frank, 2010-09 Ask a dozen talking heads about the course of action we should take to right the economy and you'll get thirteen different answers But what if we possessed a handful of basic principles that could guide our decisions both the personal ones about how to save and spend but also those national ones that have been capturing the headlines Robert H Frank has been illustrating these principles longer and more clearly than anyone else In *The Economic Naturalist's Field Guide* he reveals how they play out in Washington on Wall Street and in our own lives covering everything from healthcare to tax policy to everyday decisions about what we do with our money In today's uncertain economic climate *The Economic Naturalist's Field Guide's* insights have more bearing than ever on our pocketbooks policies and personal happiness

THE ECONOMIC NATURALIST Robert H. Frank, 2018-07-03 Why do the keypads on drive up cash machines have Braille dots Why are round trip fares from Orlando to Kansas City higher than those from Kansas City to Orlando For decades Robert Frank has been asking his economics students to pose and answer questions like these as a way of learning how economic principles operate in the real world which they do everywhere all the time Once you learn to think like an economist all kinds of puzzling observations start to make sense Drive up ATM keypads have Braille dots because it's cheaper to make the same machine for both drive up and walk up locations Travelers from Kansas City to Orlando pay less because they are usually price sensitive tourists with many choices of destination whereas travelers originating from Orlando typically choose Kansas City for specific family or business reasons *The Economic Naturalist* employs basic economic principles to answer scores of intriguing questions from everyday life and along the way introduces key ideas such as the cost benefit principle the no cash on the table principle and the law of one price This is as delightful and painless a way to learn fundamental economics as there is
