both a service and integral tool *The Impact of Employees' Behaviour in the Workplace* Emrah Atar, 2022-03-14 The rapid development of economic globalisation has caused enterprises to have a higher demand for high quality employees in order to achieve competitive advantages This has brought a significant challenge to human resource management As employees are the imperative group in enterprises for gaining profit and maintaining regular operation it is critical to raise their enthusiasm for work Their creativity and subjective initiative could be fully activated and the profit determination would increase if the appropriate motivating methods were utilised As such this collection offers detailed insights into these issues It scrutinises how motivation leadership corporate values and organisational identity have an affirmative and significant consequence on organisational citizenship behaviour and corporate human resource management and how organisational identity plays an intermediary role in an organisation **The implications of best practice event management when applied to small-scale local events** Sven Damm, 2010-05-27 Inhaltsangabe Abstract Event management is a ubiquitous word in modern society The word is used for small business breakfasts large corporate shows and also for big international sport events such as the Olympic Games We all have an idea of what management is but what is an event An event is often described as something that happens and therefore in that sense we could use the term event management to describe the organisation of everything that happens Getz defines an event as an occurrence at a given place a special set of circumstances a noteworthy occurrence and this definition embraces a wide range of possibilities with one important thing in common they can only occur once As such one key characteristic of events is that they are not continuous for they each have a beginning and an end and every event is different from the last one No matter how hard one tries it is literally impossible to replicate an event thus when watching the Olympic Games we do not see the same picture repeating itself every four years for the event changes and evolves over time Consequently to fully understand how things happen within any given event it is necessary to get involved in the planning and execution of an event Malhotra writes that events are an important aspect of human life and that our understanding of them is poorly developed He thinks that there is a need to enhance the understanding of the subject and this opinion is supported by the relative youth of academic study into the topic In their book *Festival Special Event Management* Allen O Toole Harris and McDonnell 2008 date the birth of the industry to the 1980s where several seminal events set the pattern for the contemporary event industry as we know it today Thus especially compared with other disciplines in the field of social science event management is a young discipline and there is not yet a huge base of research to work with In addition rather than academically rigorous research conducted by professional researchers much of the knowledge in the field has been generated by practising event managers who have written books about their own experiences knowledge and skills It is of no surprise that these practitioners and the events they discuss tend to reflect the planning of the biggest events the earth has seen such as the Olympic Games and US presidential inaugurations These authors possess a great deal of experience and
