downscaling process which provides a linkage between emissions and exposure concentrations at a comparatively high resolution Moreover by focusing on individual susceptibility the thesis proposes an instrumental revision of current risk assessment methodology and argues that if individual susceptibility were not taken into consideration the overall risk would be underestimated by 55% and the proportion of highly vulnerable populations would be underestimated by more than 90%

and future generations Nevertheless obstacles exist in reaching these objectives For instance the vital goals of ensuring a clean environment face threats due to the ongoing contamination of both aquatic and terrestrial ecosystems with top priority pollutants with petroleum hydrocarbons being the foremost among them In today s fast paced society environmental deterioration is an ecumenical concern This predicament is intricately linked to unregulated human activities giving rise to substantial planet problems Among these petroleum waste whether released through spills leaks from underground tanks tankers oil well blowouts or abandoned refinery sites leads to extensive contamination of surface soils groundwater seas and oceans resulting in damage to ecosystems Additionally several industries generate a substantial amount of hydrocarbon waste during crude oil processing To date various conventional methods have been employed to address these environmental hydrocarbon wastes In bygone days technological advancements haven t necessarily reduced the rate of consumption of resources for a high quality lifestyle However from both economic and environmental perspectives biological treatment stands out as the most efficient approach with co benefits Thereafter the article not only summarizes key insights from studies on the management of environmental hydrocarbon pollutants in the past decade thereby compiling recent advances in this field including the involvement of green technologies the most potentially degradable substrates classes of hydrocarbons etc but also circularity in creating a zero waste environment
